S-Supervisory Discretion

The Visitation Reaction form, CD-85 and Supervised Visitation Checklist, CD-86, can be utilized whenever visitation continues to occur. The Visitation Reaction form should be utilized whenever a child involved with the Division is having visits with a parent regardless of whether the visits are supervised. The only exceptions to using the CD-85 are if there is a court order for no visitation or visits are not occurring.

The Supervised Visitation Checklist is optional for staff. If the visit is supervised by someone other than the worker, such as the resource provider or therapist, the form should be completed by the individual supervising the visit so staff may enter the information into FACES.

The Worker/Child/Caregiver Visit Guide, CD-82, should be utilized in all FCOOHC cases as long as the case remains open. This guide can be made optional based on the supervisor's discretion. The CD-82 may be utilized in FCS cases but is not required. An example of when it may be appropriate to use this form would be if the child is in a voluntary placement.

The Parental Home Visit Checklist, CD-83, should be utilized in all FCS cases. The CD-83 should also be utilized when making home visits to parents in FCOOHC cases.
