

MO HealthNet Division Primary Care Health Home Initial Auto-enrollment Process

1. Disease markers were identified using:
 - Paid and final claims (excluding original claims that were reversed/voided) with paid dates between 8/15/2010 and 8/14/2011 with an approved primary care diagnosis in one of the first five positions on a claim.
 - Markers received from the MPCA database.
 - Markers received from the individual non-FQHC clinics.
2. Eligibility was then checked for all participants identified with diseases. The Participant must:
 - Be eligible
 - Not be locked into hospice
 - Meet spend-down
 - Pay any premiums due
3. The Participant could not have any claims paid to a CMHC within the analysis dates.
4. The Participant must have a total minimum spend of \$2,600 or more than two diseases or two diseases with tobacco use.
5. Auto-assignment was accomplished by identifying the number of visits per participant for approved sites. Participants were assigned to the site with the most paid visits.

Diagnosis list for primary care conditions (* is considered a wildcard, which is any digit/character following the digits/characters listed before the *):

AsthmaCOPD: 493*,4910,4911,49120,49121,4918,4919,4920,4928,496,5181,5182

DevelopDelay: 2998,29900,317,319

Obesity: V8521 TO V8554

Cardio: 4282*, 4283*, 4284*, 410*, 411*, 412*, 413*, 401*, 403*, 405*3981, 40201, 40211, 40291, 40401, 40411, 40491, 40403, 40413, 40493, 4280, 4281, 4289, 4294, 9971, 4292, 41400 TO 41406, 4409, 40200, 40210, 40290, 40400, 40402, 40410, 40412, 40490, 40492
