

Proposal

Drug/Drug Class:	Calcium Channel Blockers, Non-Dihydropyridine PDL Edit			
First Implementation Date:	September 1, 2004			
Revised Date:	January 12, 2023			
Prepared For:	MO HealthNet			
Prepared By:	MO HealthNet/Conduent			
Criteria Status:	 Existing Criteria Revision of Existing Criteria New Criteria 			

Executive Summary

Purpose: The MO HealthNet Pharmacy Program will implement a state-specific preferred drug list.

Why Issue Calcium channel blocking agents slow the movement of calcium across the cell membrane resulting in the reduction of contraction of both smooth and cardiac muscle and cells within the heart and blood vessels. These agents are generally classified into two groups, according to their chemical structure: dihydropyridines (amlodipine, felodipine, isradipine, nicardipine, nifedipine, and nisoldipine), and non-dihydropyridines (diltiazem and verapamil). Dihydropyridines (DHPs) have greater selectivity for vascular smooth muscle with little direct effect on the myocardium; non-dihydropyridines (non-DHPs) have less selective vasodilator activity and have a direct effect on the myocardium.

Total program savings for the PDL classes will be regularly reviewed.

Program-Specific	Preferred Agents	Non-Preferred Agents		
Information:	Cartia XT [®]	• Calan [®]		
	Dilt-XR	Calan SR [®]		
	Diltiazem CD	 Cardizem Cardizem CD[®] Cardizem LA[®] 		
	 Diltiazem ER Caps 			
	Diltiazem HCI			
	Diltiazem XR	Diltiazem LA Tabs		
	Taztia XT [®]	Matzim LA [®]		
	TiadyIt [®] ER	• Tiazac [®]		
	Verapamil HCI	Verapamil ER PM		
	 Verapamil ER Caps/Tabs 	• Verelan [®]		
	Verapamil SR	Verelan PM [®]		
Type of Criteria:	Increased risk of ADE	Preferred Drug List		
	Appropriate Indications	Clinical Edit		
Data Sources:	☑ Only Administrative Databases	□ Databases + Prescriber-Supplied		

Setting & Population

- Drug class for review: Calcium Channel Blockers, Non-Dihydropyridine
- Age range: All appropriate MO HealthNet participants

Approval Criteria

- Failure to achieve desired therapeutic outcomes with trial on 2 or more preferred agents:
 - Documented trial period for preferred agents OR
 - Documented ADE/ADR to preferred agents

Denial Criteria

- Lack of adequate trial on required preferred agents
- Therapy will be denied if all approval criteria are not met

Required Documentation

Laboratory Results: MedWatch Form:

Progress Notes: Other:

Disposition of Edit

Denial: Exception Code "0160" (Preferred Drug List) Rule Type: PDL

Default Approval Period

1 year
