

Prenatal Data Task Force – January 2011

Purpose of Task Force:

To discuss with the Missouri Department of Health and Senior Services (DHSS) staff the MO HealthNet (MHD) Managed Care health plans' benefit from receiving the data files DHSS utilizes to calculate maternal health outcomes.

Also, to discuss the potential for the health plans to receive the newly collected data from Birth Certificate data (first Pre-Natal Visit) and smoking survey by trimester which would be of benefit to the health plans for HEDIS Admin or Supplemental Databases.

The additional data would contribute to improved health plan analysis of birth outcomes.
