## MO HealthNet Managed Care Open Enrollment is January—April 3, 2017

### Why do I need to choose a new health plan?

MO HealthNet's contract with your current Managed Care health plan will end April 30, 2017, so you will need to choose a new MO HealthNet Managed Care health plan that will start on May 1, 2017.

### What do I need to do?

Enrollment Packets will be mailed November through January. Your packet will have information about your MO HealthNet Managed care health plan choices, how to choose a health plan and a Primary Care Provider (PCP) (a PCP is your doctor, nurse practitioner, clinic) and how to enroll in a health plan.

### Can I keep the same health plan and/or PCP?

If you are happy with your current health plan and PCP, you can choose them again during open enrollment. If you are not happy with your current health plan or PCP, you can choose a new one. If your current health plan is no longer available or they have reached their maximum enrollment, you will need to choose a new one. You can search for a PCP the health plans' websites online or call our Enrollment Helpline at 1-800-348-6627.

### What happens if I don't choose a new health plan and a PCP?

If you don't choose a new health plan and PCP, one will be chosen for you.

### How long will I use the health plan I am with now?

Until April 30, 2017.
