- Consultant Recommendations Regarding Medical Homes/Health Homes
  - MOHealthNet was on the call to explain the Health Home demonstration. There are 24 Health Homes, 18 of which are Federally Qualified Health Centers. There are 2 pediatric Health Homes; they are in Columbia and Bolivar. The most common issues in young children are asthma and obesity. There are 80-90 clinic sites. There were no LPHA's that applied. To apply they need to be a primary care provider and have an Electronic Health Record. There are not many children under 5 enrolled. The state funding will run through June of 2014, they aren't sure of the sustainability after that.

**CBEC Mission:**

To ensure that Missouri's early childhood programs and services are comprehensive, coordinated, accessible, adequately funded and of the highest quality to meet the needs and to promote the well-being of all young children and their families. This can be accomplished by (a) developing key partnerships, (b) building collaborative strategies and (c) ensuring equal access to necessary resources, resulting in the implementation of an effective and sustainable early childhood system.
