

Coordinating Board for Early Childhood (CBEC) - Home Visiting Work Group

Data on Community- or County-Based Early Childhood Home-Visiting Programs

The CBEC is conducting a survey on home visiting programs in Missouri serving young children and their families. While we have data on programs provided statewide or across multiple counties, we lack information on smaller community- or county-based home visiting programs. If you operate such a program, please let us know by reviewing and sending in this form.

Definition¹/Criteria – please review the following criteria:

1. *Does the program design assume home visits as the primary method for delivering the intervention?*
2. *Are a majority of services delivered (or a majority of clients served) through home visits?*
3. *Are staff trained to deliver services and supports through home visits?*
4. *Does the program design include a sustained and ongoing relationship with enrolled families over time?*²
5. *Does your program serve children within the age range of prenatal to five years? (Can serve birth to three for example.)*

If your program meets all of these criteria please fill out the remainder of this form and return via email to the address provided below.

PLEASE KEEP ALL RESPONSES TO ONE PAGE.

Name of Program:

Community or County served:

Number of children or families served: _____ per month **and/or** _____ annually

Primary funding source(s):

Please provide a brief description of your program model (e.g., purpose, frequency & duration of visits, target population, eligibility criteria, etc.).

If your program is modeled on a nationally recognized home visiting model, please indicate the model you are using:
