

Education Support Resources

Free Nutritional Food Access

By law (Healthy, Hunger-Free Kids Act of 2010, Public Law 111-296), youth in foster care are eligible for free school meals without completing an application. The Children's Division needs to provide the school documentation indicating you are a youth in foster care whose placement is the responsibility of the State.

Foster Care Education Bill of Rights

The "Foster Care Education Bill of Rights" requires public school districts and child-placing agencies to ensure youth in foster care do not fall through the cracks when it comes to receiving an education because of situations that they experience while in care.

The Foster Care Education Bill of Rights:

- Requires school districts to designate a staff person as the educational liaison for foster children. The liaison shall do the following in an advisory capacity:
 - Ensure and facilitate the proper educational placement, enrollment in school and checkout from school of foster children;
 - Assist foster care pupils when transferring schools by ensuring proper transfer of credits, records and grades;
 - Request school records within two business days of a foster child in a school; and
 - Submit records of a foster child within three business days of receiving a request for school records.
- Requires child-placing agencies to promote educational stability by considering the child's school attendance when making placement decisions. The foster care pupil shall have the right to remain enrolled in and attend his or her school of origin pending resolution of school placement disputes (HB154) or return to a previously attended school in an adjacent district (SB291).
- Provides that each school district shall accept for full or partial credit course work satisfactorily completed by a pupil attending public school or nonsectarian school according to district policy.
- Provides that if a pupil completes graduation requirements while under juvenile court jurisdiction the district shall issue the pupil a diploma from the school the pupil last attended.
- Prohibits the school district from lowering the grade of a foster child if the child is absent from school due to a change in placement or due to a court appearance, (which would include PPRT and FST meetings). Grades and credits shall be calculated as of the date the pupil left school.
- Gives school districts the authority to authorize access of a pupil's school records to any child placing agency to fulfill educational case management requirements.

Educational Stability

Educational stability should be a priority when assessing youth's placement needs and making placement decisions. The Child and Family Services Improvement and Innovation Act requires state child welfare agencies to coordinate with schools to improve educational stability for youth

in foster care at each placement change so consideration should be given as to what impact placement decisions have on a youth's educational stability.

Children's Service Workers, along with local school districts, should work together to ensure youth remain in the school they are enrolled in at the time of placement into foster care and at each placement change. When remaining in the same school district is not in the best interest of the youth, Children's Service Workers should work with local school districts to ensure children are allowed immediate enrollment into a new school with all educational records provided to the new school. [CD12-06](#) addresses this further.

Personal Plan of Study

Every student must set educational goals and create a college and career roadmap for success in high school and beyond. This roadmap, or personal plan of study, includes development of a flexible career focus and an education plan that is clearly-defined, rigorous, and relevant to assure a successful and efficient transition to postsecondary education and/or the world of work. A personal plan of study (PPS) is a student's scope and sequence of coursework and related activities based upon their chosen Career Path or Career Cluster. For more information: <http://dese.mo.gov/college-career-readiness/guidance-counseling/personal-plans-study>

Students with Disabilities

The Missouri Interagency Transition Team (MITT) was formed in 2007 by the Office of Special Education at the Missouri Department of Elementary & Secondary Education to increase interagency collaboration at the state, regional, and local levels and has developed a resource website for those individuals with disabilities who are looking for any level of independent living from school age to adulthood. It could be partial independence such as finding a job, or going to school, to full independent living, living on your own and taking care of yourself with limited or no assistance: <http://disability.mo.gov/MITT.htm>

Individualized Education Plan

Youth with special needs may be entitled to an Individualized Education Plan in their school. This is based on an identified need and evaluation. The Individual with Disabilities Education Act (IDEA) ensures youth with disabilities receive individualized supports and services to successfully complete high school and transition to post-secondary education, employment, and adult life. The Individualized Education Plan (IEP) establishes formation of concrete goals with measurable outcomes based on each individual's future plans. At age 14 the plan must address what instruction will assist the youth to prepare for transition. By age 16 the IEP must state what transition services the child needs, and specify interagency responsibilities or necessary connections. For more information: <http://dese.mo.gov/special-education/compliance/individualized-education-program-iep>

Post-Secondary Visit

Youth who are age 15 or older are entitled to a visit to a state university, community or technical college, or an armed services recruiter before being adopted or exiting to independence. The visit should include an entry application process, financial support application and availability, career options with academic or technical training, a campus tour, and other information and experience desired by you. The visit can be waived by your Family Support Team.

High School Equivalency (HiSET)

In 2014, Missouri stopped using the GED® test for its high school equivalency testing program. The *HiSET*® exam can help youth achieve this important state-issued high school equivalency credential. The cost of the test is \$95, which includes a \$60 registration fee for the cost of the test and \$7 for each of the five test sections to cover the costs of administering the test. Only 16-year-olds who have successfully completed 16 units of credit toward high school graduation and have written permission from the superintendent or principal of the school last attended reflecting compliance are eligible to test. Seventeen year-olds who have dropped out of school may take the test. Youth must be a Missouri resident and must present identification on test day at the HiSET test center. A valid permanent or temporary Missouri license (Driver, Nondriver, Intermediate, Commercial or Instruction (learners) permit), U.S. passport, or U.S. military ID. Outdated or expired identification will not be accepted. For more information about obtaining a high school equivalency certificate, call 573-751-3504 or visit <http://dese.mo.gov/adult-learning-rehabilitation-services/high-school-equivalency>

Post-Secondary Education Resources

ACT

The ACT is a national college admissions exam that tests in English, math, reading, and science. The ACT results are accepted by all 4-year colleges and universities in the United States. Most colleges and universities require this prior to admission and a youth's score can be used for some scholarships as well as determining acceptance into the school of the youth's choice. Youth in foster care are eligible to take the ACT for free. Information can be found at this link: <http://www.actstudent.org/faq/answers/feewaiver.html>

FAFSA

If a youth is a senior in high school or already graduated and wants to go to college, the youth can apply for federal financial aid by completing the Free Application for Student Financial Aid (FAFSA). Since the youth is in foster care, the youth can mark his or her self down as a one-person family which will help the youth receive the most financial aid available. You can find more information at this link: <http://www.fafsa.ed.gov/>

Definition of Independent Student

The College Cost Reduction and Access Act of 2007 (P.L. 110-84) and Higher Education Opportunity Act of 2008 (P.L. 110-315) changed the definition of independent student to include any student who "is an orphan, in foster care, or a ward of the court, or was an orphan, in foster care, or a ward of the court at any time when the individual was 13 years of age or older." This is important to know to guide youth and adoptive families in completing the FAFSA.

Education and Training Voucher Program

The Education and Training Voucher (ETV) Program allows the Children's Division to provide post-secondary education and training funds to help eligible youth interested in pursuing a higher education to reach their goals. For more information:

<http://dss.mo.gov/cd/chafee/education.htm>

Missouri Reach

During the 2009 legislative session, the general assembly placed tuition and fee waivers into statute for certain foster care students per 173.270, RSMo. In recent legislative sessions, money has been provided to support the legislation. Missouri Reach tuition waivers and fees are available to eligible youth on a tiered priority basis.
