Technical Assistance	112
CFSR and the Program Improvement Plan (PIP)	112
Conclusion	114

Introduction

In 2020, the Missouri General Assembly and the Governor enacted [House Bill 1414](#) into law. This law requires the establishment of a Response and Evaluation (R&E) Team to review and evaluate foster care case management in Missouri with the goal of implementing objective metrics to measure the quality of services for children in foster care. The Children’s Division, in conjunction with the Response and Evaluation Team, is required to develop and implement a standard report as outlined in Section 210.112 RSMo. and 13 CSR 35-35.100. The report is intended to share and analyze the data from processes outlined in the statute and the regulation and to report lessons learned from that data. The regulation requires all metrics and performance measures be designed to take into consideration the following factors:

- That caseloads of Foster Care Case Management Case Managers are capped; and
- That Foster Care Case Management Contracted Agencies may return cases to the Children’s Division for case management due to a court order.

Implementation of HB1414 was broken into three phases. The metrics outlined in the chart below are directly from regulation 13 CSR 35-35.100. The Response and Evaluation Team determined which metrics from this regulation would be included in each phase and to utilize existing federal benchmarks and definitions, when available and appropriate. When those did not exist, the Response and Evaluation Team determined how to define those measures. The regulation directs the Response and Evaluation Team to continuously evaluate the most appropriate way to assess outcomes in child welfare.

HB1414 Metric Reporting Timeline

Safety Domain (Sa), Well-Being Domain (W), Permanency Domain (P), Service Domain (Sv)

<u>Phase 1 (October 2022)</u>	<u>Phase 2 (October 2023)</u>	<u>Phase 3 (October 2024)</u>
1. Worker/Child visits (Sa)	1. Residential (W)	1. Sentinel Events (Sa) and Timely Reporting of Sentinel Events (Sv)
2. Reports of Child Abuse/Neglect in Foster Care (Sa)	2. Case Managers/Sups trauma trained/informed (W)	2. Education (W)
3. Parent/Child Visits (W)	3. Timely Achievement of child's court approved permanency plan (P)	3. Stability of Placements (P)
4. Healthy Child/Youth Exams (W)	4. Effective ratio of supervisors to supervision of Case Managers (Sv)	4. Provision of services to meet the needs of older youth (P)
5. Worker/Parent Visits (P)	5. Cases returned to CD for catastrophic costs/court order (Sv)	5. Timely development and implementation of a Social Service Plan to address the reasons why the child is in care (P) and timely development and implementation of primary and concurrent permanency plan (P)
6. Re-Entries into Foster Care (P)		

7. Number of Caseworker Changes (Sv)		
--------------------------------------	--	--

Any other metrics and outcome goals that may be required by law or that Children’s Division may decide are appropriate can be added.

Additional information regarding the origins, purpose, and implementation of HB1414, including historical information contained in previous reports, can be found on the [HB1414 Page](#).

Evaluation Tool and Metrics

Foster Care Case Management Dashboard

The Foster Care Case Management Dashboard (FCCMD), available to all case management agencies, will display Missouri’s data each month by circuit, case management provider, and county. The data and metrics will apply to both the Children’s Division and its contracted case management agencies. Each agency’s leadership and quality teams, along with the Children’s Division’s contracted case management oversight team, will review the data and create improvement plans as indicated.

Child and Family Services Review (CFSR)

In order to comply with the requirements of case evaluation, the Response and Evaluation Team made the determination to utilize the existing Child and Family Services Review process and tools in the collection of information for purposes of HB 1414 evaluation of case management. The CFSR is a federally required process for evaluating child welfare systems nationwide. The Children's Bureau conducts the CFSRs, which are periodic reviews of state child welfare systems, to achieve three goals:

- Ensure conformity with federal child welfare requirements
- Determine what is actually happening to children and families as they are engaged in child welfare services
- Assist states in helping children and families achieve positive outcomes

The CFSR case review includes children in foster care under the age of eighteen, throughout the state, and includes cases managed by Children’s Division and Foster Care Case Management (FCCM) agencies. Cases are randomly chosen quarterly following federally approved procedures. The number of foster care cases reviewed each quarter was negotiated and approved by the federal Child and Family Service Review Measurement and Sampling Committee (MASC). The CFSR case review tool assesses 18 items related to safety, permanency, and child and family wellbeing.

Missouri implemented a review process in April 2018 that embraced the standards of the federal Child and Family Services Review. The initial review system was built into the Children’s Division’s electronic case management system and mirrored all aspects of the federal onsite review instrument (OSRI). In September 2022, Missouri made the transition from their internal system to the federal online monitoring system (OMS).

The CFSR Online Monitoring System (OMS) is a web-based application consisting of the Onsite Review Instrument (OSRI), the Stakeholder Interview Guide (SIG), review and user management functions for OMS State Administrators, data indicator visualizations, and data analysis reports and tools. The OMS is used for both Children’s Bureau-led CFSRs and State-led CFSRs. States can use the OMS for their own continuous quality improvement (CQI) and training/practice purposes.

The Onsite Review Instrument is the federal review tool used to review both foster care and in-home services cases during the onsite review component of the Child and Family Services Reviews. In completing the instrument, reviewers conduct case file reviews and case-related interviews with children, parents, foster parents, caseworkers, and other professionals involved with the child. The instrument is organized into a Face Sheet and three sections. On the Face Sheet, reviewers document general information about a case, such as the type of case. The three sections focus on the outcome domains that form the basis of the Child and Family Services Reviews: safety, permanency, and child and family well-being. For each outcome, reviewers collect information on items related to that outcome.

In addition to data from the OMS, the Children’s Bureau provides each state with CFSR Data Profiles. These profiles are produced by the Children’s Bureau twice annually, typically in February and August. The profiles contain data relevant to this report. Data for the profiles is pulled from the [Adoption and Foster Care Analysis and Reporting System](#) (AFCARS) and the [National Child Abuse and Neglect Data System](#) (NCANDS).

AFCARS was established to provide data to assist in policy development and program management. Data can be used by policymakers at the federal, Tribal, and state levels to assess and identify trends related to how many children are in foster care, reasons why they enter, how they exit, and to develop strategies to prevent unnecessary placement into foster care.

The data enables the Children’s Bureau to administer the federal title IV-E foster care and adoption assistance programs more effectively. The Children’s Bureau and Administration for Children and Families (ACF) use these data sets for several purposes, including:

- Responding to Congressional requests for current data on children in foster care or those who have been adopted;
- Responding to questions and requests from other Federal departments and agencies, including the General Accounting Office (GAO), the Office of Management and Budget (OMB), the Department of Health and Human Services’ Office of Inspector General (OIG), national advocacy organizations, States, Tribes, and other interested organizations;
- Developing short and long-term budget projections;
- Developing trend analyses and short and long-term planning;
- Targeting areas for greater or potential technical assistance efforts, for discretionary service grants, research and evaluation, and regulatory change; and
- Determining and assessing outcomes for children and families.

The National Child Abuse and Neglect Data System (NCANDS) is a voluntary data collection system that gathers information from all 50 states, the District of Columbia, and Puerto Rico about reports of child abuse and neglect. NCANDS was established in response to the Child Abuse Prevention and Treatment Act (CAPTA) of 1988. The data are used to examine trends in child abuse and neglect across the country, and key findings are published in [Child Welfare Outcomes Reports](#) to Congress and annual [Child Maltreatment reports](#).

Foster Care Case Management Agency Codes (FCCM)

Due to character limits across many data entry and reporting points, each contract held by an FCCM agency is assigned an abbreviated code. For any data that is sorted by agency, these codes will represent the agency which holds the contract. It should be noted that Missouri Alliance for Children and Families (MACF) holds multiple contracts throughout the state.

- 6AW: Missouri Alliance for Children and Families (MACF); Specialized Care Contract
- 6ZA: MO Alliance Permanency Program (MACF)
- 6ZB: Children’s Permanency Partnership
- 6ZC: St. Louis Partners
- 6ZO: Crittenton
- 6ZM: Springfield Children’s Coalition (MACF)
- 6ZL: Southwest Children’s Coalition (MACF)
- 6ZJ: Central Children’s Coalition (MACF)
- 6ZK: South Central Children’s Coalition (MACF)
- 6ZR: Kansas City Children’s Coalition (MACF)
- 6ZS: Southeast Children’s Coalition (MACF)
- 6ZV: KVC Missouri (Previously named Great Circle and changed to KVC in 4/2023)

Standardized Stakeholder Feedback Tool

Regulation 13 CSR 13 35-35.100 requires the use of a standardized stakeholder feedback tool annually. Missouri designed the feedback tool in the form of a survey. The purpose of the survey is to collect data from stakeholders pertaining to the quantity, quality, and effectiveness of case management services provided by the Division and its Foster Care Case Management (FCCM) Agencies. Surveys are sent to the following groups:

- Youth in Alternative Care (12+)
- Foster Parents & Resource Parents
- Adoptive Parents
- Parent(s) or Legal Guardian(s) of Children in Care
- Juvenile Officers
- Judges of the Juvenile and/or Family Court

As of March 2024, the Children’s Division and FCCM agencies have adopted an electronic survey platform to send and receive survey information. The surveys include rating scale questions and open-ended questions.

Surveys were emailed to stakeholders in December 2024 using email addresses from the electronic case management system (FACES) used by CD and FCCM. Additionally, CD and FCCM staff were provided a survey link to share with any stakeholder which may not have had an email address in FACES. Three hundred and ninety-eight (398) surveys were completed by stakeholders.

All survey responses were sent to FCCM Oversight, FCCM Quality Assurance, CD Program Managers, CD Program Development Specialists, CD Circuit Managers, and CD Regional Field Operations Specialists for local continuous quality improvement conversations.

Standardized Stakeholder Survey Responses (Reporting Period: December 2024)

Respondents were given the following instructions:

Using the rating scale below, answer which question best shows how you feel. If you had experience with more than one agency, please complete a separate survey for each agency for which you are addressing.

1 = Strongly Disagree 2 = Disagree 3 = Agree 4 = Strongly Agree

Survey results listed as “unable to be displayed” indicates the participant left the survey before the page was displayed.

Adoptive Parent Survey Responses

Thirty-one (31) survey responses were received from Adoptive Parents. All surveys displayed below were answered in their entirety. Two surveys were unable to be displayed. The percentage of positive responses has decreased for all questions when compared to the previous reporting period.

Adoptive Parent Survey Responses							
Question #		Strongly Disagree	Disagree	Agree	Strongly Agree	Total	% Positive Responses
1	Prior to adoption, my family understood the established permanency plan.	4	1	5	21	31	84%
2	The case manager clearly communicated the adoption process and timeline of court procedures.	4	7	8	12	31	65%
3	My family understands the adoption plan and staffing process.	5	2	8	16	31	77%
4	The adoption subsidy contract was created with our feedback and our child(ren) future needs in mind.	5	3	7	16	31	74%
5	Overall, I am satisfied with the services provided during the adoption process.	6	5	6	14	31	65%

Biological Parent Survey Responses

One hundred and eleven (111) survey responses were received from Biological Parents. All surveys displayed below were answered in their entirety. Three surveys were unable to be displayed. The percentage of positive responses has either decreased or had no change for all questions when compared to the previous reporting period.

Biological Parent Survey Responses							
Question #		Strongly Disagree	Disagree	Agree	Strongly Agree	Total	% Positive Responses
1	I know how to contact my agency worker.	20	9	30	52	111	74%
2	I am satisfied with the amount of contact I have with the case manager(s).	54	13	18	26	111	40%
3	I am satisfied with the quality of contact I have with the case manager(s).	58	10	14	29	111	39%
4	My case manager responds to my needs timely.	50	15	14	32	111	41%
5	I have at least monthly visitation with my child(ren).	35	11	18	47	111	59%
6	I have a voice in developing case planning goals and decisions for my family.	60	18	9	24	111	30%
7	I have been able to invite my friends and family supports to have a voice in developing case planning goals and decisions for my family.	63	11	12	25	111	33%
8	I am aware of services and activities in my community for myself and my family.	48	21	14	28	111	38%
9	The case manager(s) working with my family treats me with respect and values my opinions.	49	14	21	27	111	43%
10	The Family Support Team respects my values, beliefs, and traditions.	63	11	13	24	111	33%
11	I have someone, other than my case manager, who I can talk with if I need support or help.	45	12	16	38	111	49%
12	Agency involvement has made a positive impact in my family.	67	13	10	21	111	28%

Resource Parent Survey Responses

One hundred and thirty-nine (139) survey responses were received from Resource Parents. All surveys displayed below were answered in their entirety. Four surveys were unable to be displayed. The percentage of positive responses has either decreased or had no change for all questions when compared to the previous reporting period.

Resource Parent Survey Responses							
Question #		Strongly Disagree	Disagree	Agree	Strongly Agree	Total	% Positive Responses
1	I am aware of how to contact the case manager for daytime and/or after-hour emergencies.	11	12	30	86	139	83%
2	I have clear, open communication with my case manager.	20	13	22	84	139	76%
3	The case manager(s) provided adequate information on the child(ren) placed in my home (i.e. physical/mental health, behaviors, etc.)	26	17	30	66	139	69%
4	The case manager(s) working with the child(ren) in my home treats me with respect and values my opinions.	17	9	26	87	139	81%
5	The case manager(s) working with the child(ren) in my home is respectful of the child's cultural background and specific needs.	12	6	30	91	139	87%
6	The case manager(s) working with the child(ren) in my home assists in accessing resources and referrals needed to meet the child's needs.	20	21	27	71	139	71%
7	I have a voice in the case planning for the child(ren) in my home.	25	19	27	68	139	68%
8	The case manager(s) visits the child(ren) in my home at least once per month.	15	6	21	97	139	85%
9	Home visits and meetings that I am to attend are scheduled with consideration for my family's schedules.	18	9	30	82	139	81%
10	I am informed of court hearings timely.	28	13	28	70	139	71%
11	I have the opportunity to provide information in court hearings.	23	16	33	67	139	72%
12	Overall, I feel supported by agency staff in doing my job.	28	13	27	71	139	71%
13	I would recommend fostering to other people in the community.	36	16	21	66	139	63%

Older Youth (12+) Survey Responses

Forty-seven (47) survey responses were received from Older Youth. All surveys displayed below were answered in their entirety. Three surveys were unable to be displayed. Six of the 15 questions show an increase in the percentage of positive responses when compared to the previous reporting period.

Older Youth (12+) Survey Responses							
Question #		Strongly Disagree	Disagree	Agree	Strongly Agree	Total	% Positive Responses
1	I have a voice in case planning.	5	6	14	22	47	77%
2	In Family Support Team meetings, I am able to share what is important to me.	3	6	15	23	47	81%
3	I understand my case plan.	4	3	17	23	47	85%
4	I know my goals for the future.	3	1	13	30	47	91%
5	My case manager supports me in the achievement of my goals.	6	4	10	27	47	79%
6	I am informed of the date and time of court hearings.	7	2	9	29	47	81%
7	I am heard in court hearings.	5	8	9	25	47	72%
8	My case manager prepares me to speak for myself in court hearings.	10	8	10	19	47	62%
9	I am satisfied with the amount of contact I have with my case manager.	4	6	10	27	47	79%
10	I know how to contact my case manager.	3	2	8	34	47	89%
11	I understand why I have a case manager.	1	2	10	34	47	94%
12	My case manager talks with me about my concerns.	3	5	10	29	47	83%
13	My case manager responds to my needs. For example: accessing resources and providing referrals.	5	6	7	29	47	77%
14	My case manager respects my identity and culture.	4	1	12	30	47	89%
15	I feel safe in my placement.	1	1	9	36	47	96%

Juvenile Officer Survey Responses

Thirty-nine (39) survey responses were received from Juvenile Officers. All surveys displayed below were answered in their entirety. With the exception of one question, the percentage of positive responses has decreased for all questions when compared to the previous reporting period.

Juvenile Officer Survey Responses							
Question #		Strongly Disagree	Disagree	Agree	Strongly Agree	Total	% Positive Responses
1	Are you notified of Family Support Team meetings two weeks in advance?	3	12	14	10	39	62%
2	Are court reports received prior to court? (A description of the facts pertaining to the case, any updates on progress or lack of progress made towards the safety goals, any relevant changes to the family situation, the recommended permanency and concurrent plan for each child, and any recommendations made by the Family Support Team)	9	10	17	3	39	51%
3	In general, are court reports easy to understand?	0	12	25	2	39	69%
4	Are court reports and other information given to you helpful in preparing for court?	4	11	22	2	39	62%
5	Are case managers familiar with the case at court?	0	12	20	7	39	69%
6	Are case managers prepared and knowledgeable while testifying?	2	14	17	6	39	59%
7	In general, are case managers available within a reasonable amount of time?	0	4	29	6	39	90%
8	Are case managers supportive of their clients?	0	4	28	7	39	90%
9	Do you feel you are able to provide input during Family Support Team meetings?	1	4	24	10	39	87%
10	Do you feel attorneys representing case managers help to move the case to permanency quicker?	6	12	13	8	39	54%
11	Do you feel you are able to provide input during other interactions with the team?	0	2	27	10	39	95%

Judge Survey Responses

Sixteen (16) survey responses were received from Judges. All surveys displayed below were answered in their entirety. Five of eight questions show an increase in the percentage of positive responses when compared to the previous reporting period.

Judge Survey Responses								
Question #		Strongly Disagree	Disagree	Agree	Strongly Agree	I have no information	Total	% Positive Responses
1	Has your circuit achieved at least 95% timeliness for required hearings in accordance with Court Operating Rule 23.01?	1	0	4	10	1	16	88%
2	Is transportation offered/available to families to assist them in attending court hearings?	2	5	3	0	6	16	19%
3	Are foster parents, pre-adoptive parents, relative caregivers, and families given an opportunity to be heard during court proceedings?	1	2	2	11	0	16	81%
4	Are families given an opportunity to provide input during treatment planning?	1	0	2	8	5	16	71%
5	Are affidavits, reports, and other paperwork submitted by the case manager to the Court purposeful, specific, factual, and pertinent to the work being done with the family being served?	1	2	8	5	0	16	81%
6	With regard to parents requesting legal representation in accordance with SCR 115.03, is the process to obtain legal representation explained by Court staff in a timely, developmentally appropriate manner, utilizing clear and understandable language?	1	0	4	9	2	16	81%
7	In general, are all parties present and prepared for court hearings?	1	0	8	7	0	16	94%
8	In general, are case managers knowledgeable about the case and helpful during court proceedings?	1	1	7	7	0	16	88%
		Set Hearing Times			Blocks of Time			
9	Are dockets scheduled with set hearing times or in blocks of time?	7			9		16	N/A

Phase I Reporting (Reporting Period: October 1, 2024 – December 31, 2024)

A. Safety Domain: Caseworker Monthly Visits with Children in Foster Care

Children’s Division policy states that the caseworker should meet face-to-face with the child a minimum of one time per month with the majority of the visits being in the placement to monitor and assess the safety of the child.

Table 1 below depicts the percentage of children in foster care seen by a worker during the calendar month. This data set is displayed by each county and each agency in the state. It should be noted that not all agencies (including CD) have children in custody in all counties during all reporting months. Those agencies will have no data displayed.

County	Agency	October	November	December
Adair	CD	96.3%	98.1%	96.6%

*Source: DSS\Research Report SS.EHRH5Y7.JCL.PROD(HB14DM0) RS5HBDM0, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Chart 1:

Number of circuits requiring Worker Child visits in October: 46.
 Number of circuits meeting the benchmark for Worker Child visits: 32 (69.6%).

Number of circuits requiring Worker Child visits in November: 46.
 Number of circuits meeting the benchmark for Worker Child visits: 30 (65.2%).

Number of circuits requiring Worker Child visits in December: 46.
 Number of circuits meeting the benchmark for Worker Child visits: 29 (63.0%).

Charts 2 & 3 depict circuits that met or exceeded the benchmark all three months during the reporting period. The federal goal is 95%.

*Source: DSS\Research Report SS.EHRH5Y7.JCL.PROD(HB14DM0) RS5HBDM0, 08NOV2024; 09DEC2024; 09JAN2025

**Chart 3: Circuits That Met or Exceeded Benchmark Each Month
October-December 2024 - Federal Goal is 95%**

*Source: DSS\Research Report SS.EHRH5Y7.JCL.PROD(HB14DM0) RS5HBDM0, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Charts 2 & 3: Twenty-two (22) circuits met or exceeded the benchmark for Worker Child visits in October, November, and December of 2024. This is a decrease from 25 circuits the previous reporting period.

Chart 4 depicts the percentage of children in foster care seen by a worker during the calendar month. This data set is displayed by each agency. The federal goal is 95%.

**Chart 4: Worker Child Visits October-December 2024
Federal Goal is 95%**

*Source: DSS\Research Report SS.EHRH5Y7.JCL.PROD(HB14DM0) RS5HBDM0, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Chart 4:

Number of agencies that met the benchmark during each month: October (9), November (6), December (9).

Four (4) agencies met the benchmark all three months: 6AW, 6ZB, 6ZK, and 6ZR. This is a decrease from seven agencies the previous quarter.

Child and Family Services Review (CFSR) Data: Item 14 of the CFSR evaluates frequency and quality of caseworker visits with children in foster care. The purpose of these visits is to ensure the child’s safety, permanency, and well-being and to promote achievement of case goals. Chart 5 depicts the 36 cases reviewed this reporting period. This chart reflects a statewide view that includes both CD and any FCCM agencies who had cases reviewed.

*Source: Missouri CFSR-Item 14 Data, October-December 2024

Analysis of Chart 5: Twenty-nine (29) of the 36 cases available for review were rated Strength in this area. The visits were rated a Strength in frequency because they were typically about an hour in duration and occurred at least monthly. The visits were of sufficient quality because they included face-to-face contact with the child in the placement setting. Some visits occurred with the child alone and some occurred with the placement provider when the child’s age or developmental level was not conducive to meeting with the child alone. The caseworker observed the home during the visits to assess appropriateness and safety of the living environment. Conversations with both the child and the placement providers focused on the child’s needs, services, and case planning.

Of the 36 cases reviewed, seven (7) were rated Area Needing Improvement (ANI) in the frequency and/or quality of the caseworker visits with a child. Factors contributing to a rating of ANI included the worker not visiting with the child alone and not observing the child’s interactions with other household members. In two cases, it was determined that the child might have benefitted from more than monthly visitation to assess and assist with issues in the placement home and to promote placement stability.

Data Analysis Summary for Worker Child Visits:

Forty-seven (47) counties met the benchmark all three months. This is a decrease from 66 counties the previous reporting period.

Four (4) agencies met the benchmark all three months. This is a decrease from seven agencies the previous reporting period.

Twenty-two (22) circuits met the benchmark all three months. This is a decrease from 25 circuits the previous reporting period.

Twenty-nine (29) cases (81%) were rated a Strength on CFSR reviews for caseworker visits with children. This is an increase from 39% of cases during the previous reporting period.

B. Safety Domain: Victimization in Foster Care

Victimization in foster care is defined as a child in foster care whom the state has determined to be the victim of abuse or neglect by at least one preponderance of evidence finding. It should be noted that this metric measures a rolling calendar year, thus a report counted in one month will be reflected in subsequent months until the 12-month period has been reached for that report.

Table 2 depicts the Rate of Victimization for each county and each agency in the state during the reporting period. It should be noted that not all agencies (including CD) have children in custody in all counties during all reporting months. Those agencies will have no data displayed. The goal for this measure is 9.06% or less. A lower value is desirable.

Analysis of Table 2:

Number of counties that met the benchmark each month:

October (79). This is an increase from 75 counties the previous reporting period.

November (89). This is an increase from 81 counties the previous reporting period.

December (89). This is an increase from 78 counties the previous reporting period.

Number of counties that met the benchmark all three months in the reporting period: 76.

Chart 6 depicts the number of circuits in relation to their rate of victimization for children in foster care. This data includes children managed by both CD and FCCM agencies. The goal is 9.07 or less. A lower number is desirable.

Chart 6: Victimization Rates Grouped by Circuit				
National Performance is 9.07 or Less (lower is better)				
	A	B	C	D
	20.01+	15.01-20.00	9.08-15.00	0.00-9.07
October	0	2	5	39
November	0	2	2	42
December	0	1	5	40

Analysis of Chart 6:

Number of circuits with victimization rates in October: 46.

Number of circuits that met the benchmark for victimization: 39 (84.8%).

Number of circuits with victimization rates in November: 46.

Number of circuits that met the benchmark for victimization: 42 (91.3%).

Number of circuits that met the benchmark for victimization in December: 46.

Number of circuits that met the benchmark for victimization: 40 (86.9%).

Chart 7 depicts victimization in foster care by each agency. The goal is 9.07 or less. A lower number is desirable.

Chart 7: Victimization in Foster Care October-December 2024
National Performance is 9.07 or Less (lower is better)

Analysis of Chart 7: Eleven (11) agencies met the goal all three months. Two agencies met the goal one out of three months.

Child and Family Services Review Data: Risk Standardized Performance (RSP) is used to assess state performance on the CFSR statewide data indicators. RSP is derived from a multi-level statistical model and considers the number of children the state served, the age distribution of these children, and, for one data indicator, the state’s entry rate. It uses risk adjustment to minimize differences in outcomes due to factors the state has little control over and provides a fairer comparison of state performance against the national performance. For more information about how RSP is calculated, please visit [What is National Performance and How is it Calculated](#). The reporting period for this report corresponds to the federal fiscal year, October through September. The goal of 9.07 or less is based on the National Performance of 9.07. A lower value is desirable.

It should be noted that CFSR Data Profiles are based on the semiannual submission of Adoption and Foster Care Analysis and Reporting System (AFCARS) data from states. They are produced by the Children’s Bureau and shared with Missouri approximately every six months, in February and August of each year. The chart below is from the data profile produced in February 2024 and was reported in the previous quarterly report. New data will be available when it is provided by the Children’s Bureau to Children’s Division.

Chart 8 compares the rate of victimization for children in foster care in Missouri to the rate of victimization for children in foster care nationwide.

*Source: MO CFSR 4 Data Profile, Released February 2025

Data Analysis Summary:

Seventy-six (76) counties met the goal all three months of the reporting period. This is an increase of eight counties from the previous reporting period.

Eleven (11) agencies met the goal all three months of the reporting period. This is no change from the previous reporting period.

More than 80% of all circuits met the goal for victimization every month.

CFSR Data Profile indicates Missouri’s most recent federal fiscal year rate of victimization is 5.19, which is below the national performance of 9.07.

C. Well-Being Domain: Parent Visits with Child

Children’s Division policy is to facilitate at least one visit a month for each child for parents that are eligible to receive visits. In some cases, visits are prohibited due to a court order. Neither CD nor FCCM agencies are required to facilitate visits where a court has ordered no visitation to occur.

Table 3 depicts the percentage of parent child visits completed by each county and each agency in the state during the reporting period. It should be noted that not all agencies (including CD) have children in custody in all counties during all reporting months. Those agencies will have no data displayed. The goal established by the R&E Team for this measure is 60%.

Analysis of Table 3:

Eight (8) counties met the benchmark for October: Grundy, Harrison, Hickory, Knox, Mercer, Osage, Pike, and Platte. This is an increase from one county the previous reporting period.

Eleven (11) counties met the benchmark for November: Dade, Harrison, Hickory, Howard, Mercer, Moniteau, Monroe, Osage, Pike, Platte, and Putnam. This is an increase from six counties the previous reporting period.

Eight (8) counties met the benchmark for December: Harrison, Hickory, Knox, Mercer, Moniteau, Monroe, Osage, and Putnam. This is an increase from five counties the previous reporting period.

Four (4) counties met the benchmark all three months during the reporting period: Harrison, Hickory, Mercer, and Osage. This is an increase from one county the previous reporting period.

Six (6) counties met the benchmark two of three months during the reporting period: Knox, Pike, Platte, Putnam, Moniteau, and Monroe.

Chart 9 depicts the number of circuits in relation to their percentage of monthly visits between parents and children. This data includes children managed by both Children’s Division and FCCM agencies. The Response & Evaluation Team set a benchmark of 60% for this metric.

Chart 9: Parent Child Visits Grouped by Circuit						
R&E Goal is 60%						
	A	B	C	D	E	F
	0.00%- 19.99%	20.0%- 29.99%	30.0%- 39.99%	40.0%- 49.99%	50.0%- 59.99%	60% or greater
October	18	5	12	4	5	2
November	18	6	12	5	3	2
December	16	10	12	4	2	2

*Source: DSS\Research Report SS.EHRH5Y7.JCL.PROD(HB14EMX) RS5HBEM0, 08NOV2024; 09DEC2024; 09JAN2025

Chart 9 Analysis: Two (2) circuits met the benchmark in October, two (2) circuits met the benchmark in November, and two (2) circuits met the benchmark in December. The highest concentration of other circuits falls into the 0.00%-19.9% and 30.0%-39.9% ranges.

Chart 10 depicts the percentage of parent child visits completed by each agency. The Response & Evaluation Team set a benchmark of 60% for this metric.

**Chart 10: Parent Child Visits October-December 2024
Response & Evaluation Team Agreed-Upon Goal is 60%**

*Source: DSS\Research Report SS.EHRH5Y7.JCL.PROD(HB14EMX) RS5HBEM0, 08NOV2024; 09DEC2024; 09JAN2025

Chart 10 Analysis: Parent Child Visit data reflects one agency, 6ZR, met the benchmark of 60% two of three months during the reporting period.

Child and Family Services Review Data: Item 8 of the CFSR evaluates frequency and quality of each applicable parent’s visits with their child to ensure the child’s safety, permanency, and well-being and to promote achievement of case goals. To be applicable for review of this item, each parent must be either a parent from whom the child was removed or who had a preexisting relationship with the child, and with whom the agency is working toward reunification. Frequency of the visits, or how often they occur, is assessed based on the circumstances of the case, including the child’s age and imminence of reunification.

Factors considered in assessing the quality of the child’s visits with their parents include, but are not limited to, the duration of visits, whether they took place in a comfortable atmosphere that would encourage interaction, and whether unsupervised visits were allowed to take place in the parent’s home.

Chart 11 depicts the percentage of cases that had an overall rating of Strength or Area Needing Improvement (ANI) regarding the child’s visits with the mother and father. To receive an overall rating of Strength, all parents identified as applicable for review of this item must have received a Strength rating for both the frequency and quality of their visits with their children. This chart reflects a statewide view that includes both CD and any FCCM agencies who had cases reviewed.

*Source: Missouri CFSR-Item 8 Data, October-December 2024

Analysis of Chart 11: Of 31 cases applicable for rating of this item, 16 received an overall rating of Strength, indicating that both the frequency and quality were sufficient.

Fifteen (15) cases were rated ANI. All cases received that rating, at least in part, due to inadequate frequency of visits with one or both parents. In one case, the visitation plan was flexible to allow the mother and placement provider to schedule visitation as often as their schedules would allow. The mother would often arrive for unscheduled visits when the child was sleeping or in daycare. It is unknown if the confusion about scheduling visits was due to the mother's intellectual disabilities. It is possible that a set visitation schedule, established by the caseworker, would have promoted more consistent visits between the child and mother.

Chart 12 depicts the percentage of cases in which the children's visits with their mother and father were of sufficient frequency or quality to promote continuity in the child's relationships with them. The number of cases applicable for rating frequency and quality can differ. For example, if the child never visited the parent, then the rating would reflect that the visits were not of sufficient frequency and the quality of the visits would not be rated, as there were no visits during which the quality could have been demonstrated. Each bar indicates how many cases were applicable for rating (n) and the percentage of sufficient frequency and quality.

*Source: Missouri CFSR-Item 8 Data, October-December 2024

Analysis of Chart 12: Twenty-nine (29) cases were applicable for review regarding the frequency of the child’s visits with the mother. Of those, 21 were rated Strength and eight (8) were rated ANI. Sixteen (16) cases were applicable for review of the frequency of the child’s visits with the father. Of those, nine were rated Strength, and seven were rated ANI. Factors contributing to a rating of Strength included visits occurring more than once per week. In most cases with a Strength rating, there was a gradual increase in visitation as the case progressed and safety concerns were rectified. In most cases, additional phone contact occurred between the child and parent(s) several times each week. In one case with an ANI rating, the visitation plan was flexible to allow the mother and placement provider to schedule visitation as often as their schedules would allow. The mother would often arrive for unscheduled visits when the child was sleeping or in daycare. It is unknown if the confusion about scheduling visits was due to the mother’s intellectual disabilities. It is possible that a set visitation schedule, established by the caseworker, would have promoted more consistent visits between the child and mother.

Twenty-three (23) cases were applicable for review regarding the quality of the caseworker’s visits with the mother. Of those, 20 were rated Strength and three (3) were rated ANI. Twelve (12) cases were applicable for review of the quality of the caseworker’s visits with the father. Nine (9) were rated Strength and three were rated ANI. Common themes of cases receiving a Strength rating for quality include visits where the parent(s) and child can strengthen the parent-child relationship as well as practice responsibilities that comprise the role of a parent.

Data Analysis Summary:

Four (4) counties met the benchmark all three months. This is an increase from one county the previous reporting period.

The 3rd Circuit met the benchmark all three months of the reporting period. This is an increase from no circuits the previous reporting period.

No agencies met the benchmark all three months.

Sixteen (16) of 31 cases reviewed for CFSR received a rating of Strength meaning they met the requirements for both frequency and quality.

When comparing this quarter’s CFSR results to the previous reporting period, there was a 2.2% decrease in cases receiving an overall rating of Strength.

Parent-Child visits may be underrepresented in the data. Information related to parent-child visitation has been difficult to identify and extract from FACES due to irregularities in the location of documentation in the system.

Barriers to accurate data collections include:

1. There are many options to select a person’s relationship with a child and if not entered correctly the visit is not counted in the data.
2. Several steps need to be taken in specific screens in FACES for a parent-child visit to be captured in the data. It is believed that some staff are entering these visits elsewhere in FACES (e.g., as contacts) causing those parent/child visits to be uncounted.

Two additional barriers have been identified related to court and Family Support Team decisions. Some court jurisdictions require a negative drug screen from parents with a history of substance abuse prior to allowing a visitation to occur between a parent and child. In most areas of the state, it is a prohibition by the court and/or the Family Support Team for foster children to have visits with their parents if their parents are incarcerated.

Technical Assistance has been provided from the Quality Assurance teams to Children’s Division and Foster Care Case Management staff about how and where to enter the parent-child visits within FACES. This assistance will be ongoing.

D. Well-Being Domain: Medical Exam Completion (HCY)

Every child is required to have a Healthy Child and Youth Exam (HCY) within 30 days of entering foster care. The HCY exam includes basic vision, hearing and dental screenings. This data could include children who were in care for less than 30 days.

Table 4 depicts the percentage of children who entered care during the reporting period and received an HCY exam within 30 days of entry. This data set is displayed by each county and each agency in the state. It should be noted that not all agencies (including CD) have children in custody in all counties during all reporting months. Those agencies will have no data displayed. Additionally, 6AW does not receive new foster care entries and is therefore not included in this measure. The goal established by the R&E Team is 98%.

Analysis of Table 4:

Number of counties requiring HCY exams for October: 75.

Number of counties that met the benchmark for timely HCY exam completion: 43 (57.3%).

Number of counties requiring HCY exams for November: 78.

Number of counties that met the benchmark for timely HCY exam completion: 28 (35.8%).

Number of counties requiring HCY exams for December: 66.

Number of counties that met the benchmark for timely HCY exam completion: 31 (46.9%).

Thirty-three (33) counties met the benchmark in all months where HCY exams were required.

Chart 13 depicts the number of circuits in relation to their percentage of timely HCY completions. This data includes children managed by both Children’s Division and FCCM

agencies. It should be noted that not all circuits had new foster care entries requiring HCY exam completions during this reporting period.

Chart 13: HCY Exams Completed Within 30 Days of Entering AC Custody Grouped by Circuit						
R&E Goal is 98%						
	A	B	C	D	E	F
	0.0%-24.9%	25.0%-39.9%	40.0%-64.9%	65.0%-79.9%	80.0%-97.9%	98% or greater

December	6	2	10	2	8	12

*Source: DSS\Research Report SS.BROWVCR.JCL.SCHDLR(HB1414F) RS5HBFM0, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Chart 13:

Number of circuits requiring HCY exams for October: 43.

Number of circuits that met the benchmark for timely HCY exam completion: 18 (41.8%).

Number of circuits requiring HCY exams for November: 44.

Number of circuits that met the benchmark for timely HCY exam completion: 11 (25.0%).

Number of circuits requiring HCY exams for December: 40.

Number of circuits that met the benchmark for timely HCY exam completion: 12 (30.0%)

Five (5) circuits met the benchmark in all months where HCY exams were required: Circuit 01, Circuit 02, Circuit 03, Circuit 30, and Circuit 38.

Chart 14 depicts circuits that met or exceeded the benchmark in all months where HCY exams were required during the reporting period.

*Source: DSS\Research Report SS.BROWVCR.JCL.SCHDLR(HB1414F) RS5HBFM0, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Chart 14: Five (5) circuits met the benchmark in all months where HCY exams were required.

Chart 15 depicts the percentage of children, by agency, who entered care during the reporting period and received an HCY exam within 30 days of the entry. It should be noted that 6AW does not receive new foster care entries and is therefore excluded from this measure.

*Source: DSS\Research Report SS.BROWVCR.JCL.SCHDLR(HB1414F) RS5HBFM0, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Chart 15: Two (2) agencies, 6ZJ and 6ZS, met the benchmark all three months of the reporting period and three agencies (6ZC, 6ZK, & 6ZO) met the benchmark two out of the three months during the reporting period.

Child and Family Services Review Data: Item 17 of the CFSR assesses whether the agency conducted accurate initial and on-going assessments of, and addressed, the physical health needs of the child, including dental needs.

Chart 16 depicts the percentage of cases that had an overall rating of Strength or Area Needing Improvement (ANI). This chart reflects a statewide view that includes both CD and any FCCM agencies who had cases reviewed.

*Source: Missouri CFSR-Item 17 Data, October-December 2024

Analysis of Chart 16: Of the 36 cases reviewed, 18 were rated Strength, indicating all physical health needs, including dental, were assessed, and addressed. Eighteen (18) were rated ANI. In 12 cases rated ANI, the targeted child’s dental health needs were not appropriately assessed and/or addressed. In one case rated ANI, the child had failed a vision screening during a routine healthy child and youth examination but had not been to the eye doctor to determine if the child required corrective glasses.

Item 18 of the CFSR assesses whether the agency addressed the mental/behavioral health needs of the child. Foster care cases are only applicable for an assessment of this item if the child had mental/behavioral health needs, including substance abuse issues.

Chart 17 depicts the percentage of cases that had an overall rating of Strength or Area Needing Improvement (ANI). This chart reflects a statewide view that includes both Children’s Division and any FCCM agencies who had cases reviewed.

*Source: Missouri CFSR-Item 18 Data, October-December 2024

Analysis of Chart 17: Of 18 cases applicable for review, seven (7) were rated Strength. Factors contributing to a Strength rating include accurately assessing and addressing the child’s mental/behavioral health needs, providing appropriate services to address identified needs, and providing appropriate oversight of prescription medications. Eleven (11) cases were rated ANI. Six (6) cases were rated ANI, at least partly, due to the agency’s failure to appropriately address the child’s mental/behavioral health once those needs had been identified. Two (2) cases were rated ANI because the agency did not provide appropriate oversight of prescription medications by discussing medication management during monthly worker/child visits with the placement provider.

Data Analysis Summary:

Thirty-three (33) counties met the benchmark in all months where HCY exams were required. This is a decrease from 37 counties from the previous reporting period.

Five (5) circuits met the benchmark in all months where HCY exams were required. This is a decrease from eight circuits the previous reporting period.

Two (2) agencies met the benchmark for HCY exams. This is an increase from one circuit the previous reporting period.

The quarterly CFSR case review results reflect there is improvement needed in the assessment of physical and mental health needs and the provision of services to meet those needs. When comparing this quarter’s CFSR results to the previous reporting period, there was a 14.5% increase in cases receiving an overall Strength rating for Item 17 and a 9.1% decrease in cases receiving an overall Strength rating for Item 18.

E. Permanency Domain: Worker Visits with Parent

Children’s Division policy requires at least one worker visit with each parent each month.

Table 5 depicts the percentage of parents of children in foster care that were visited by an agency worker for each month. This data set is displayed by each county and each agency in the state. It should be noted that not all agencies (including CD) have children in custody in all counties during all reporting months. Those agencies will have no data displayed. The goal of 50% was established by the R&E Team.

Table 5: Worker Parent Visits – R&E Goal is 50%

Analysis of Table 5:

Number of counties that met the benchmark each month: October (40), November (31), December (35).

Twenty-two (22) counties met the benchmark all three months of the reporting period: Adair, Andrew, Atchison, Cape Girardeau, Carroll, Carter, Gasconade, Gentry, Grundy, Harrison, Hickory, Holt, Lincoln, Livingston, Madison, Mercer, New Madrid, Nodaway, Pike, Putnam, St. Francois, and Ste. Genevieve. This is an increase from 21 counties the previous reporting period.

Charts 18 & 19 depict circuits that met or exceeded the benchmark for worker parent visits all three months during the reporting period. This chart includes both CD and FCCM data. The Response & Evaluation Team set a benchmark of 50%.

*Source: DSS\Research Report SS.EHRH5Y7.JCL.PROD(HB14DM0) RS5HBDM0, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Charts 18 & 19: Fifteen (15) circuits met the benchmark for worker parent visits in all three months of the reporting period. This is an increase from 13 circuits the previous reporting period.

Chart 20 depicts the percentage of parents of children in foster care that were visited by each agency. The Response & Evaluation Team set a benchmark of 50%.

Analysis of Chart 20: One (1) agency, 6ZK, met the benchmark in all three months of the reporting period. One (1) agency, 6ZV, met the benchmark two of three months during the reporting period.

Child and Family Services Review Data: Item 15 of the CFSR assesses whether the frequency and quality of the worker’s visits with each of the parents was sufficient to ensure the safety, permanency, and well-being of the child and promote achievement of case goals.

Chart 21 depicts the percentage of cases where the caseworker’s visits with the mother and father were of sufficient frequency or quality. The number of cases applicable for rating of each of these measures can differ. For example, if the agency did not conduct a visit with the parent, the rating would reflect the visits were not of sufficient frequency and the quality would not be rated, as no visits occurred to measure the quality. Each bar indicates how many cases were applicable for rating (n). This chart reflects a statewide view that includes both CD and any FCCM agencies who had cases reviewed.

*Source: Missouri CFSR-Item 15 Data, October-December 2024

Analysis of Chart 21: Twenty-seven (27) cases were applicable for review regarding the frequency of the caseworker’s visits with the mother. Of those, 16 were rated Strength and 11 were rated ANI. Twenty (20) were applicable for review of the frequency of the caseworker’s visits with the father. Of those, seven (7) were rated Strength and 13 were rated ANI.

All cases received a rating of ANI for the frequency of visits due to those visits occurring less than monthly with few or inconsistent attempts to engage parents in monthly visits. In one case, it was reported that the lack of visits between the agency worker and the father was due to conflicting work schedules. The agency worker did not work past 5pm and the father worked until 6pm on most days. Most cases receiving a Strength rating included those where in-person visits occurred at least monthly. If visits did not occur monthly, the agency made concerted efforts to engage the parent(s) through in-person visit attempts, phone calls, and emails.

Twenty-six (26) cases were applicable for review regarding the quality of the caseworker’s visits with the mother. Of those, 20 were rated Strength and six were rated ANI. Sixteen (16) cases were applicable for review of the quality of the caseworker’s visits with the father. Eight (8) cases were rated Strength and eight were rated ANI.

Cases that received a Strength rating for quality included visits between the agency worker and the and/or father where issues pertaining to safety, permanency, and wellbeing of the child were assessed and addressed. Visits occurred in comfortable settings that promoted engagement and quality conversations.

A common factor contributing to ANI for quality of visits indicated a lack of conversations centered around case planning, service delivery, and goal achievement. In one case, the frequency and quality of the visits with both parents was sufficient after the father’s release from incarceration. However, during the father’s incarceration, the agency worker made few to no attempts to contact or engage the father in service planning.

Data Analysis Summary:

Twenty-two (22) counties met the benchmark all three months of the reporting period. This is an increase from 21 counties the previous reporting period.

Fifteen (15) circuits met the benchmark for worker parent visits in all three months of the reporting period. This is an increase from 13 circuits the previous reporting period.

One (1) agency, 6ZK, met the benchmark in all three months of the reporting period. This is no change from the previous reporting period. 6ZV met the benchmark two of three months during the reporting period. This is a decrease from two agencies the previous reporting period.

Quarterly CFSR case review results indicate the frequency of worker visits with mothers (59.3%) and fathers (35.0%) is below the federal goal of 95%. The quality of worker visits with mothers (76.9%) and fathers (50.0%) was also below the federal goal. When comparing this quarter's CFSR results to the previous reporting period, there was improvement in both the frequency and quality of worker visits with both mothers and fathers.

Twenty-nine (29) cases were applicable for review of both frequency and quality of worker visits with mothers and fathers. Of those, 12 (41.4%) received an overall Strength rating, meaning both frequency and quality were sufficient. This is an increase from 12.5% Strength ratings from the previous reporting period.

F. Permanency Domain: Reentry into Foster Care

Reentry into foster care is identified as foster children who exited care to reunification, guardianship, or placement with a fit and willing relative during a 12-month period and then reentered care within 12 months of their exit date. The reentry is counted for the agency that was assigned the case when it closed in the system. A 0.00% represents that there were no reentries. MO Alliance (6AW) is a specialized case management contract serving children and youth with very complex needs which could contribute to a higher frequency of reentries.

Table 6 depicts children who reentered care in October, November, and December of 2024. This table displays reentry information for each county and each agency in the state. It should be noted that not all agencies (including CD) have children in custody in all counties during all reporting months. Those agencies will have no data displayed. The National Performance for this measure is 5.6% or less. A lower percentage is desirable.

Analysis of Table 6:

Number of counties that met the benchmark of 5.6% or less: October (76), November (78), December (78).

Seventy-four (74) counties met the benchmark in all months with reentry data during the reporting period.

Chart 22 depicts the number of circuits in relation to their percentage of children who reentered foster care. The data includes children managed by both CD and FCCM agencies. The National Performance for this measure is 5.6% or less. A lower percentage is desirable.

Goal is 5.6% or Less (lower is better)				
	A	B	C	D
	12.5% +	10.1%-12.4%	5.7%-10%	0%-5.6%
October	2	1	9	34
November	2	1	8	35
December	2	2	8	34

*Source: DSS\Research Report SS.BROWVCR.JCL.SCHDLR(HB1414C) ELIPS RS5HBCM0, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Chart 22: Number of circuits with reentries in October: 46.

Number of circuits that met the benchmark for reentry: 34 (73.9%)

Number of circuits with reentries in November: 46.

Number of circuits that met the benchmark for reentry: 35 (76.1%)

Number of circuits with reentries in December: 46.
 Number of circuits that met the benchmark for reentry: 34 (73.9%)

Chart 23 reflects children who reentered care in October, November, and December of 2024. The National Performance for this measure is 5.6% or less. A lower percentage is desirable.

*Source: DSS\Research Report SS.BROWVCR.JCL.SCHDLR(HB1414C) ELIPS RS5HBCM0, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Chart 23: The benchmark was met by seven of the 14 agencies in all three months of the reporting period. Two agencies met the benchmark in two of the three months of the reporting period.

Child and Family Services Review Data: Risk Standardized Performance (RSP) is used to assess state performance on the CFSR statewide data indicators. Risk-Standardized Performance (RSP) is derived from a multi-level statistical model and takes into account the number of children the state served, the age distribution of these children, and, for one data indicator, the state’s entry rate. It uses risk adjustment to minimize differences in outcomes due to factors over which the state has little control and provides a fairer comparison of state performance against the national performance. For more information about how the RSP is calculated, please visit [What is National Performance and How is it Calculated](#). A lower rate is desirable. This data does not differentiate between Children’s Division and FCCM agencies.

It should be noted that CFSR Data Profiles are based on the semiannual submission of Adoption and Foster Care Analysis and Reporting System (AFCARS) data from states. They are produced by the Children’s Bureau and shared with Missouri approximately every six months, in February and August of each year. The chart below is from the data profile produced in February 2025 and was reported in previous quarterly reports. New data will be available when it is provided by the Children’s Bureau to Children’s Division in August of 2025.

Chart 24 compares the rate of reentry into foster care for children in Missouri to the rate of reentry into foster care for children in the nation.

*Source: MO CFSR 4 Data Profile, Released February 2025

Analysis of Chart 24: On the most recent Missouri Data Profile, released in February of 2025, performance for Reentry into Foster Care was unable to be calculated. This happens when a state exceeds the data quality limit on one or more data quality checks completed for the data indicator, or there is missing AFCARS and/or NCADS submissions.

Data Analysis Summary:

Seventy-four (74) counties met the benchmark all three months during the reporting period. This is no change from the previous reporting period.

More than two-thirds of all circuits met the benchmark for reentry all three months of the reporting period.

Seven (7) agencies met the benchmark all three months of the reporting period. This is a decrease from eight agencies the previous reporting period.

G. Service Domain: Average Number of Workers Per Child in Care (Less Than 12 Months and 12+ Months)

This measure observes the average number of workers assigned to children who have been in foster care less than 12 months and those in care 12 or more months. There is no federal benchmark for the number of case workers per child and a benchmark has not yet been established by the R&E Team. It should be noted that the average number of workers includes all workers assigned to a case and is not separated between Children’s Division and FCCM. The measure is pulled by who is currently case managing the case. For example, if the case had two CD workers and two 6AW workers and the case is currently case managed by 6AW, then the average would be reflected under 6AW.

Table 7 depicts the average number of workers for each child who was in care less than 12 months. This data set is displayed by each county and each agency in the state where data is available. It should be noted that not all agencies (including CD) have children in custody in all counties during all reporting months. Those agencies will have no data displayed.

Analysis of Chart 25: The majority of circuits have an average of 1.1-2.0 workers for children in care less than 12 months.

Chart 26 depicts the average number of workers for children who were in care less than 12 months. This data set is displayed by agency. A lower number is desirable for this measure.

*Source: DSS\Research Report SS.BROWVCR.JCL.SCHDLR(HB1414B) ELIPS RS5HBBM0, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Chart 26: Agencies averaged anywhere from 1.36 to 2.25 workers for children in foster care less than 12 months.

Table 8 depicts the average number of workers for children who were in care 12 months or more. This data set is displayed by each county and each agency in the state. It should be noted that not all agencies (including CD) have children in custody in all counties during all reporting months. Those agencies will have no data displayed.

Analysis of Table 8: For October, November, and December of 2024, children in foster care 12 months or more experienced between one and 16 workers.

Chart 27 depicts the average number of workers for children in care 12 months or more. This data set is grouped by circuits and includes both CD and FCCM information together.

Chart 27: Average # of Workers per Child in Care 12+ Months Grouped by Circuit				
	A	B	C	D
	4.01-5.15	3.01-4.00	2.01-3.00	1.00-2.00
October	11	24	9	2
November	11	24	9	2

*Source: DSS\Research Report SS.BROWVCR.JCL.SCHDLR(HB1414B) ELIPS RS5HBBM0, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Chart 27: The majority of circuits have an average of 3.01-4.00 workers for children in care 12 months or more.

Chart 28 depicts the average number of workers per agency for children in care 12 months or more. A lower number is desirable for this measure.

*Source: DSS\Research Report SS.BROWVCR.JCL.SCHDLR(HB1414B) ELIPS RS5HBBM0, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Chart 28: Agencies averaged anywhere from 3.33 to 6.58 workers for children in foster care 12 months or more. This is a decrease from the average of 3.34 to 6.75 workers during the previous reporting period.

Child and Family Services Review Data: There is no CFSR case review information applicable to this measure. Research does indicate that with each worker change children can experience delays in reaching permanency. The Response and Evaluation Team included this measure to help understand the functioning of the child welfare system in Missouri because continued changes can impact how children and families are served.

Data Analysis Summary:

Children in care 12 months or less experienced an average of:

- 1-3.25 workers at the county level
- 1.1-2.0 workers at the circuit level
- 1.36-2.25 workers at the agency level

Children in care 12 months or more experienced an average of:

- 1-16 workers at the county level
- 3.01-4 workers at the circuit level
- 3.33-6.58 at the agency level

Phase II Reporting (Reporting Period: October 31, 2024 – December 31, 2024)

H. Well-Being Domain: Placement Category/Residential Type

This measure depicts the child’s primary placement type in foster care. The Response and Evaluation Team will determine the expected performance benchmarks once enough data is collected to establish a reasonable goal.

Non-Residential Placement Types

Foster Home	Trial Home Visit
FHO - Foster Home	THV - Trial Home Visit
FHE - Emergency Foster Home	Other
FGH - Foster Family Group Home	JHO - Juvenile Court Home
CFP - Career Foster Parent Home	CTO - Non-licensed court ordered facility
FHB - Behavioral Foster Home	ILA - Independent Living Arrangement
FGB – No longer utilized as a placement type.	MMD - Medical Facility
FGM –No longer utilized as a placement type.	MMH - Mental Health Home
FHM - Medical Foster Home	MMF - Mental Health Facility
Relative Home	MMW - Mental Health Medical Waiver
RHO - Relative Home	DET - Detention
RHB - Behavioral Relative Home	RFT - Residential Facility Transition Placement
RHM - Medical Relative Home	RUN - Runaway
RHU - Unlicensed Relative Home	SCH - School
KHU - Unlicensed Non-Relative Home	UNK - Unknown
KHO - Non-Relative/Kinship Home	TLG - Transitional Living Group Home
KHM - Medical Non-Relative Home	TLP - Transitional Living Placement
KHB - Behavioral Non-Relative Home	TLS - Transitional Living Scattered Site
LGS - Legal Guardianship Subsidy	TLA - Transitional Living Advocate
Adoptive Home	ESP - Emergency shelter placement
ADF - Adoption by foster parent	
ADR - Adoption by relative	
ADO - Adoption by other	
FAH - Foster Adoptive Home	

Tables 9-11 depict a percentage of primary placement types for foster children by each county and each agency. Adoptive Home placement types/codes are used when children are placed in pre-adoptive homes awaiting finalization of their adoption. Additional youth/children are placed in committed homes who have been recognized by the Family Support Team or court as the permanent resource upon the legal termination of parental rights. Those situations are represented in several placement categories for foster and relative homes. Youth on a Trial Home Visit are counted as its own placement category. Beginning in March 2024, Treatment Foster Care is captured in the Relative and Foster Home categories when a sub-placement category of Relative Home or Foster Home is identified. If no sub-placement category is identified, then Treatment Foster Care is captured in residential placement categories.

Analysis of Tables 9-11: The majority of placements for foster children occur in either a Relative Home or Foster Home with Relative Home placements occurring more frequently than Foster Home placements. For all three months of the reporting period, Relative Home placements accounted for more than 46% of the total placements for foster children. All agencies are making efforts to place children with relatives. 6AW is a specialized contract that serves children with higher behavioral needs. This population sometimes lacks stability and can frequently change placements.

Residential Placement Types

FBR – Family Based Residential	RFI – Residential Facility Infant Placement
RF2 – Residential Level 2 – (Moderate Need)	RFP - Residential Facility Placement
RF3 – Residential Level 3 (Severe Need)	RFH – Residential Foster Home
RF4 – Residential Level 4 (Intensive Need)	RST - Residential Sex Trafficking Facility
PRTF – Psychiatric Residential Treatment Facility	RFT - Residential Facility Transition Placement
RFE – Residential Facility Emergency Placement	RFM - Residential Facility Maternity Placement
RFA – Residential Treatment Facility	

Tables 12-14 depict the percentages of residential placement types for children placed in residential settings. This information is displayed by each county and each agency. Additional information about each placement type can be found in the [Child Welfare Manual](#).

Analysis of Tables 12-14: Most children who are receiving residential services are in a Level 4 placement. For all three months of the reporting period, Level 4 residential placements accounted for more than 47% of the total residential placements.

As defined in the Child Welfare Manual, a Level 4 placement is “an extended placement resource for children requiring active, coordinated, and professional intervention in a highly structured and secure environment. Such children will have demonstrated an inability to function in any less restrictive setting. This level is indicated for children who have a significant emotional and/or psychiatric need. These children present a chronic runaway risk and typically present a history of impulsivity, intensity of behavioral problems, significant family issues, self-destructive behaviors, etc. Residential Treatment agencies should provide reunification services, work with the family, community-based services, schools, etc. as a part of the therapeutic

services provided. They present a chronic runaway risk. They also typically present a history of showing rage, including physical aggression”.

Chart 29 depicts the percentage of foster children who are placed in a residential setting. This data set is grouped by circuits and includes both CD and FCCM information together.

Chart 29: Residential Placement Utilization Grouped by Circuit				
	A	B	C	D
	0.00-5.00	5.01-10.00	10.01-15.00	15.01 +
October	26	15	5	0
November	20	22	4	0
December	21	22	3	0

*Source: DSS\Research Report RS5HBGM0 JIRA=5054; 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Chart 28:

Twenty-six (26) circuits (56.52%) maintained at or below 5.00% residential utilization in October.

Twenty (20) circuits (43.84%) maintained at or below 5.00% residential utilization in November.

Twenty-one (21) circuits (45.65%) maintained at or below 5.00% residential utilization in December.

Chart 30 depicts the percentage of foster children who are placed in a residential setting. This data is displayed by agency.

*Source: DSS\Research Report RS5HBGM0 JIRA=5054; 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Chart 30: Five (5) agencies maintained below 5.00% residential utilization during all three months of the reporting period. Four agencies maintained below 5.00% residential utilization two of three months during the reporting period.

Child and Family Services Review Data: Item 10 of the CFSR assesses if concerted efforts were made to place the child with relatives. All foster care cases are applicable for rating of this item except for cases in which the child needed specialized care throughout their entire time in foster care, making placement with relatives unsuitable, or situations where the identities of both parents and all relatives are unknown despite documented efforts to identify them.

Chart 31 depicts the percentage of cases where sufficient efforts were made to place with relatives.

*Source: Missouri CFSR-Item 10 Data, October-December 2024

Analysis of Chart 31: Of 31 cases applicable for rating of this item, 26 cases were rated a Strength. All cases rated Strength were cases where the child was placed either in a relative home placement, on a trial home visit, or concerted efforts to locate the relative placements had been exhausted during the period under review.

Nine (9) cases were rated ANI. All nine cases received an ANI rating due to the agency's failure to locate, identify, inform, and evaluate relatives for potential placement. In two cases, relatives were identified out-of-state, but the agency did not follow through with completing an Interstate Compact on the Placement of Children referral to evaluate the appropriateness of the relatives for placement.

Data Analysis Summary: When comparing placement types of children in foster care over the past three months, most children are placed in relative placements.

Foster children in residential placements are mostly in a Level 4 placement type. The number of children in residential placements continues to decrease. In September of 2024, 577 Missouri

foster children were placed in residential placements. In December of 2024, that number has decreased to 560.

In December of 2024, the State of Missouri maintained 5.02% residential utilization.

CFSR data indicates the state is not meeting the federal goal of 95% for concerted efforts made to place children with relatives. When comparing this quarter’s CFSR case review results to the previous reporting period, there was a 3% increase in cases receiving an overall rating of Strength.

I. Well-Being Domain: Case Managers and Supervisors Trauma Trained/Informed

Children's Division and the private Foster Care Case Management agencies do not share a common platform to record and track staff training completion. Great effort has been made to integrate training data however such processes are labor intensive and unreliable. The Office of Administration is implementing a new training tracking system in 2025 which is expected to resolve this issue. It should be noted that all staff are required to complete trauma-informed training within 12 months of their hire date. Staff are being trauma trained despite the difficulty in uniformly tracking and reporting on their completion.

J. Permanency Domain: Timely Achievement of Child's Court Approved Plan

Timely achievement of a child’s court-approved plan is considered permanency. This measure looks at timely permanency (through reunification, adoption, guardianship, or living with a relative) for children in foster care. Table 15 depicts the percentage of children in foster care where permanency is achieved within 12 months of children entering foster care. This data is displayed by each county and each agency. It should be noted that counties with no information available have been excluded from the data set. This number is calculated by dividing the number of children who enter foster care in a 12-month period (denominator) and the number of children in the denominator who are discharged to permanency within 12 months of entering foster care (numerator). The National Performance for this measure is 35.2%.

Analysis of Table 15:

Number of counties that met or exceeded the National Performance for timely permanency within 12 months: October (27), November (28), December (25).

Nineteen (19) counties met or exceeded the National Performance timely permanency for those entering care within 12 months all three months of the reporting period.

Table 16 depicts timely permanency for children who have been in foster care for at least 12 months and not more than 23 months. This data is displayed by each county and each agency. This number is calculated by dividing the number of children in foster care on the first day of a 12-month period who had been in foster care continuously between 12 and 23 months (denominator) by the number of children in the denominator who discharged to permanency

within 12 months of the first day of the 12-month period (numerator). The National Performance for this measure is 43.8%.

Analysis of Table 16:

Number of counties that met or exceeded the National Performance for timely permanency within 12-23 months: October (46), November (49), December (45).

Thirty-seven (37) counties met or exceeded the National Performance timely permanency for those in care 12-23 months all three months of the reporting period.

Table 17 depicts timely permanency for children who have been in foster care for 24 months or more. This data is displayed by each county and each agency. This number is calculated by dividing the number of children in foster care on the first day of a 12-month period who had been in foster care continuously for 24 months or more (denominator) by the number of children in the denominator who discharged to permanency within 12 months of the first day of the 12-month period (numerator). The National Performance for this measure is 37.3%.

Analysis of Table 17:

Number of counties that performed at or higher than the National Performance for timely permanency in 24 months or more: October (28), November (29), December (26).

Twenty-one (21) counties performed at or higher than the National Performance for timely permanency for those in care 24 months or more all three months of the reporting period.

Charts 32-34 depict circuits that met or exceeded the National Performance for permanency in all three timeframes (within 12 months; 12-23 months; 24+ months) for each month of the reporting period. This data is grouped by circuit and includes both CD and FCCM information together.

Chart 32: Circuits that Met or Exceeded National Performance for Permanency in all Three Timeframes - October 2024

*Source: DSS\Research Report RS5HBHM0 JIRA 5150; 08NOV2024

Chart 33: Circuits that Met or Exceeded National Performance for Permanency in all Three Timeframes - November 2024

*Source: DSS\Research Report RS5HBHM0 JIRA 5150; 09DEC2024

Chart 34: Circuits that Met or Exceeded National Performance for Permanency in all Three Timeframes - December 2024

*Source: DSS\Research Report RS5HBHM0 JIRA 5150; 09JAN2025

Analysis of Charts 32-34:

October: Four (4) circuits met or exceeded the National Performance for permanency in all three timeframes.

November: Three (3) circuits met or exceeded the National Performance for permanency in all three timeframes.

December: Four (4) circuits met or exceeded the National Performance for permanency in all three timeframes.

Chart 35 depicts whether permanency is achieved within 12 months of children entering foster care. This data is displayed by each agency statewide.

*Source: DSS\Research Report RS5HBHM0 JIRA 5150; 08NOV2024; 09DEC2024; 09JAN2025

HB 1414 (2020) Response and Evaluation Report for Case Management of Children in Foster Care
April 2025

Chart 36 depicts whether permanency is achieved for children who have been in foster care for at least 12 months and not more than 23 months. This data is displayed by each agency statewide.

*Source: DSS\Research Report RS5HBHM0 JIRA 5150; 08NOV2024; 09DEC2024; 09JAN2025

Chart 37 depicts whether permanency is achieved for children and youth in care for 24 months or more. This data is displayed by each agency statewide.

*Source: DSS\Research Report RS5HBHM0 JIRA 5150; 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Charts 35-37:

Number of agencies that met or exceeded National Performance for timely permanency for those entering care within 12 months all three months of the reporting period: 1 (6ZT).

Number of agencies that met or exceeded National Performance for timely permanency within 12-23 months all three months of the reporting period: 4 (6ZL, 6ZM, 6ZT, CD).

Number of agencies that met or exceeded National Performance for timely permanency for those in care 24 months or more all three months of the reporting period: 5 (6ZC, 6ZK, 6ZS, 6ZT, CD).

Child and Family Services Review Data: Item 6 of the CFSR assesses whether concerted efforts were made to achieve the case goal.

Chart 38 depicts the percentage of cases in which sufficient efforts were made to achieve the case goal in a timely manner. This chart reflects a statewide view that includes both CD and any FCCM agencies who had cases reviewed.

*Source: Missouri CFSR-Item 6 Data, October-December 2024

Analysis of Chart 38: Of the 36 cases reviewed, 18 cases were rated Strength. Timely identification of a case goal and consistent parent engagement were common themes in cases with a Strength rating. Additional factors contributing to a Strength rating include timely identification of permanent placement resources and timely negotiation of adoption and guardianship subsidy agreements.

Eighteen (18) cases were rated ANI for this item. A lack of changing case goals in a timely manner was a common theme in cases rated ANI for timely achievement of the case goal. In one case rated ANI, the timeframe for timely achievement of the case goal will likely be met; however, the timeframe could have been met sooner had visits between the child and father started sooner. In another case with an ANI rating, a referral was submitted to the Division of Legal Services to initiate a termination of parental rights filing by the agency worker in a timely manner. The Division of Legal Services did not file the petition for the termination of parental rights until 20 months after the referral had been made.

Data Analysis Summary:

Timely permanency within 12 months of entering care:

Nineteen (19) counties met or exceeded the National Performance for October, November, and December 2024. This is an increase from 12 counties the previous reporting period.

One (1) agency (6ZT) met or exceeded the National Performance for October, November, and December 2024. This is no change from the previous reporting period.

Timely permanency within 12-23 months of entering care:

Thirty-seven (37) counties met or exceeded the National Performance in October, November, and December 2024. This is no change from the previous reporting period.

Four (4) agencies (6ZL, 6ZM, 6ZT, & CD) met or exceeded the National Performance for October, November, and December 2024. This is no change from the previous reporting period.

Timely permanency for those in care 24 month or more:

Twenty-one (21) counties met or exceeded the National Performance met or exceeded the National Performance for October, November, and December 2024. This is an increase from 20 counties the previous reporting period.

Five (5) agencies (6ZC, 6ZK, 6ZS, 6ZT, CD) met or exceeded the National Performance for October, November, and December 2024. This is an increase from three agencies the previous reporting period.

Four (4) circuits met or exceeded the National Performance for timely permanency in all three timeframes (12 months or less, 12-23 months, 24+ months) in October: Circuit 25, Circuit 30, Circuit 40, and Circuit 44. This is a decrease from seven circuits the previous reporting period.

Three (3) circuits met or exceeded the National Performance for timely permanency in all three timeframes (12 months or less, 12-23 months, 24+ months) in November: Circuit 04, Circuit 30, and Circuit 40. This is a decrease from five circuits the previous reporting period.

Four (4) circuits met or exceeded the National Performance for timely permanency in all three timeframes (12 months or less, 12-23 months, 24+ months) in December: Circuit 25, Circuit 27, Circuit 30, and Circuit 40. This is a decrease from five circuits the previous reporting period.

CFSR data indicates that the state is not meeting the federal goal of 95% for timely achievement of the case goal. When comparing this quarter's CFSR case review results to the previous reporting period, there is a 24% increase in cases receiving an overall rating of Strength for timely achievement of the case goal.

K. Service Domain: Effective Ratio of Supervisors to Supervision of Case Managers

This measures the number of Supervisors to Case Managers for children in foster care.

Table 18 depicts the Supervisor to Case Manager ratio for FCCM agencies from October through December of 2024. The Response and Evaluation Team will determine the benchmark for this measure once enough data is collected to establish a reasonable goal.

Agency	October	November	December
6AW	9:36	9:34	9:33
6ZA	11:46	11:47	11:45
6ZB	10:27	9:26	9:28
6ZC	9:35	10:34	11:34
6ZJ	7:31	7:30	7:30
6ZK	2:10	2:10	2:10
6ZL	3:14	3:15	3:14
6ZM	4:18	4:20	4:19
6ZO	5:31	5:34	5:33
6ZR	7:38	7:38	7:37
6ZS	4:17	4:16	4:16
6ZV	4:13	4:15	3:14

*Source: DSS\Research Data SS.EHRH5Y7.JCL(PH2SUPMF) RS5HBIM0 JIRA 5055, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Table 18: FCCM Supervisor to Case Manager ratios range from 2:10 to 11:47, October through December of 2024.

Table 19 depicts Supervisor to Case Manager ratios for Children’s Division by each circuit. The reason this table is displayed by circuit instead of a total for the agency is due to the concentration of children case managed by Children’s Division as compared to individual Foster Care Case Management agencies.

Circuit	October	November	December
01	2:3	2:3	2:3
02	2:5	3:5	3:5
03	1:3	1:3	1:3
04	2:5	2:5	2:5

46	3:8	3:8	3:8

*Source: DSS\Research Data SS.EHRH5Y7.JCL(PH2SUPMF) RS5HBIM0 JIRA 5055, 08NOV2024; 09DEC2024; 09JAN2025

Analysis of Table 19: Children’s Division Supervisor to Case Manager ratios by Circuit range from 1:1 to 6:23 October through December of 2024.

Data Analysis Summary: As a state, Supervisor to Case Manager ratios ranged from 1:1 to 11:47, October through December 2024.

L. Service Domain: Cases Returned to CD for Catastrophic Costs/Court Order

The intent of the measure was to monitor cases returned to Children’s Division when FCCM agencies experience catastrophic costs. However, there is no available data as it is no longer the practice for FCCM agencies to return cases due to high cost. The new practice is for Children’s Division to take over the placement cost once a threshold of \$100,000.00 is reached within a 12-month timeframe. The case will remain with the FCCM for all other case management services. The last FCCM case returned to Children’s Division for this reason was in August 2022. The practice was ended in October 2022.

Technical Assistance

Beginning in June of 2024, Technical Assistance meetings have occurred on a quarterly basis throughout all FCCM regions of the state. The purpose of these meetings was to collaborate between CD FCCM Oversight, FCCM Quality Assurance, and Children's Division Regional Field Operations Specialists for local continuous quality improvement. The goal of bringing both FCCM and CD partners together is to review data trends, identify areas of needed improvement, set goals for the following quarter, and share best practice efforts to meet goals.

During the meetings, HB1414 data is reviewed, and informal plans are established for ways to improve the data. Emphasis has been placed on improvement of parent engagement and an increase in Worker-Parent visitation. FCCM and CD teams have been able to collaborate with one another to discuss ways to overcome barriers to meeting the metric of Worker-Parent visits.

Since implementation of the collaborative meetings, Worker-Parent visits have improved from 39.40% (June 2024) to 43.00% (December 2024) for the state as a whole. In June of 2024, only one agency (6ZK) was meeting the benchmark for Worker-Parent visits. In October and November of 2024, four agencies met the benchmark for Worker-Parent visits. In December of 2024, that number decreased to one agency meeting the goal.

CD Oversight staff continue to visit FCCM work sites on a semiregular basis during their data entry days to provide technical assistance with accurate FACES data entry.

In all areas of the state, the CD Field Operations Specialists (FOPS) are visiting with CD circuits quarterly. During these quarterly circuit meetings, the FOPS are discussing all Phase I HB 1414 metrics and benchmarks with field supervisors and staff. Barriers to meeting HB 1414 benchmarks are discussed and strategies for overcoming barriers are implemented. For instance, in more than one region of the state, a strategy for overcoming the barrier of late data entry has been implemented that includes the FOPS sending a case specific list of missing visit and HCY data one week prior to the data being extracted from the FACES system. The purpose of this strategy is to call attention to data that remains to be entered in the hopes that this will remind field staff of their requirement to enter their missing data prior to the data being pulled and reported on.

All areas of Technical Assistance are ongoing and regional meetings between FCCM and CD teams will continue on a quarterly basis.

CFSR and the Program Improvement Plan (PIP)

Missouri participated in a Children's Bureau-led CFSR review during the week of July 24, 2023. Case reviews occurred in Kansas City (Circuit 16), Poplar Bluff (Circuit 36), and Troy (Circuit 45). Stakeholder interviews also occurred during the weeks of July 17 and 24 of 2023, and those were completed in Jefferson City, both through in-person interviews and virtual settings. Based on the information gained from the statewide assessment, case reviews, and stakeholder interviews, Children's Bureau provided the CFSR Round 4 Final Report to Missouri Children's Division in October 2023.

HB 1414 (2020) Response and Evaluation Report for Case Management of Children in Foster Care
April 2025

Missouri was found to be the same as or better than National Performance in five of the seven Statewide Data Indicators. All safety indicators and three of the five permanency indicators were better than National Performance. Missouri was not able to reach the 90%-95% benchmark for any of the case review items. Additionally, eight out of the 18 systemic factor items were rated as strengths.

As a result of this review, the Program Improvement Plan (PIP) was developed with goals, strategies, and action steps to address areas of weaknesses identified in the CFSR review. The PIP was federally approved on October 10, 2024, with an implementation start date of November 1, 2024. The end of the PIP implantation period is October 31, 2026, with the post-PIP evaluation period ending on April 1, 2028.

Three of the five areas of the PIP focus will impact the metrics established in HB 1414. It is important to note that there are multiple strategies being implemented for each focus area; however, not all strategies are being implemented statewide. Below is a brief overview of the current and upcoming PIP focuses and implementation strategies established by the PIP that are relevant to HB 1414:

PIP Focus #1: Placement Stability

HB 1414 relevance: Stability of placements; timely achievement of child's court approved permanency plan.

Goal: Decrease the number of placement moves that children in foster care experience.

Strategies:

- Implement Comfort Calls to establish relationships between biological parents and placement providers to support placement stability;
- Enhance support to placement providers statewide by increasing their knowledge of placement stability services available to them;
- Improve the quality of circuit-based recruitment and retention plans in order to increase the number of foster homes which better match the foster care child demographic and more accurately identify supports needed by existing foster and relative providers.

PIP Focus #2: Family Engagement

HB 1414 relevance: Worker with child visits; worker with parent visits; parent with child visits.

Goal: Increase family engagement and better match recommended and required services to the needs of parents and children in order to address the safety and risk concerns that necessitated family involvement in the child welfare system.

Strategies:

- Increase the frequency and quality of worker visitation with parents and children to enhance engagement in the case planning and service delivery processes;
- Establish an evaluation plan for the Child Welfare Practice Training (CWPT) to assess the effectiveness of initial staff training and ensure Children's Division's newly hired

case management staff have the skills and knowledge to engage families involved in the child welfare system;

- Increase case management staff's knowledge of trauma experiences and how those experiences impact actions and decision through the use and practice of Trust Based Relational Information (TBRI) training;
- Use the Team Decision-Making model to gain a more accurate assessment of parents' needs so that agency team members and contracted case managers can articulate the needs of parents in relation to safety concerns and appropriate services and be provided to meet identified needs.

PIP Focus #3: Timely Permanency

HB 1414 relevance: Timely achievement of child's court approved permanency plan.

Goal: Increase the timeliness of permanency for children in foster care.

Strategies:

- Improve timeliness to permanency within 12 months within child welfare practice by identifying barriers to permanency through process mapping key federal, legal, and various state policy requirements and timeframes beginning with removal of the child from the home to 15 months post-custody;
- Reexamine and modify the statewide Family Support Team (FST) process that guides assessment of reunification efforts and ensures timely permanency, up to and including the filing of TPR petitions, to achieve more timely permanency;
- Co-sponsor a training opportunity in partnership with OSCA, Children's Division, and national experts to bring national best practices in parenting time and work with families impacted by substance use to legal and judicial partners, agency staff, and multidisciplinary team members to better support timely reunification;
- Identify and train a Permanency Specialist to ensure adequate service provision, knowledge transfer, and the completion of permanency paperwork, including the filing of TPR petitions and steps to achieve permanency through adoption.

Conclusion

House Bill 1414 Implementation continues to be ongoing. Phase I began in October 2022, Phase II began in October 2023, and Phase III was projected for October 2024. There is progress being made in all areas of the work. As the data is collected, analyzed, and discussed, it is the intent of this legislation and work to make systematic recommendations to improve outcomes for children and families.

In April of 2024, a Request for Extension was made by the Response and Evaluation Team to the Director of the Department of Social Services for the postponement of a portion of Phase II and all of Phase III until 2025 and 2026, respectively. This request for postponement has been approved. The legal basis for this request is pursuant to 13 CSR 35-35.100(3)(E).

Phase II requires that "All case managers and supervisors successfully complete training in providing trauma-informed and trauma-based services". The training data has proved difficult

HB 1414 (2020) Response and Evaluation Report for Case Management of Children in Foster Care
April 2025

and unreliable to measure as Children’s Division and the private Foster Care Case Management agencies do not share a common platform in which to record and track staff training completion. A new training tracking system is scheduled to be implemented later in 2025 which is expected to resolve this issue.

Phase III requires measurement of multiple metrics which would require modification of the current computer system. All changes to the current computer system have been discontinued in order to concentrate resources on the creation of a new computer system, expected in 2025-2026. The new system is being designed to capture all the required data in Phase III.

The next reporting period is January 1, 2025, through March 31, 2025 with the report to be published by July 1, 2025.

For previous reports, please visit our website: https://dss.mo.gov/hb_1414.html.
