

SmartPA Criteria Proposal

Drug/Drug Class:	Cough and Cold Preparations PDL Edit
First Implementation Date:	May 31, 2013
Proposed Date:	March 17, 2022
Prepared For:	MO HealthNet
Prepared By:	MO HealthNet/Conduent
Criteria Status:	<input checked="" type="checkbox"/> Existing Criteria <input type="checkbox"/> Revision of Existing Criteria <input type="checkbox"/> New Criteria

Executive Summary

Purpose: The MO HealthNet Pharmacy Program will implement a state-specific preferred drug list.

Why Issue Selected: The common cold is a viral illness that affects persons of all ages, prompting frequent use of over-the-counter and prescription medications, as well as alternative remedies. Cough and cold formulations are available for the use in the treatment of the signs and symptoms of the common cold, sinusitis, allergies and cough. They come in various combinations as simple cold preparations, narcotic cough and cold formulations and non-narcotic cough and cold products. In March 2011 the FDA removed many unapproved prescription cough, cold and allergy drug products from the U.S. market. Unapproved prescription cough, cold, and allergy drug products have not been evaluated by the FDA for safety, effectiveness, and quality. The MO HealthNet Pharmacy Program has identified the following products as FDA approved and available on the market. These listed agents will be the preferred products available first line, all other products are considered non-preferred.

Total program savings for the PDL classes will be regularly reviewed.
