

SmartPA Criteria Proposal

Drug/Drug Class:	Antihistamines, Ophthalmic PDL Edit
First Implementation Date:	April 26, 2006
Proposed Date:	March 18, 2021
Prepared For:	MO HealthNet
Prepared By:	MO HealthNet/Conduent
Criteria Status:	<input type="checkbox"/> Existing Criteria <input checked="" type="checkbox"/> Revision of Existing Criteria <input type="checkbox"/> New Criteria

Executive Summary

Purpose: The MO HealthNet Pharmacy Program will implement a state-specific preferred drug list.

Why Issue Selected: The estimated prevalence of seasonal allergic conjunctivitis is 15% and the condition occurs in both adults and children. The common allergens include pollens, dust mites, mold spores, animal dander, perfumes, and food sensitivities. Humidity, temperature, and a person's activity are all factors that affect the intensity, frequency, and duration of the allergic response. Activation of the immune response results in the release of inappropriately high amounts of chemical mediators – most commonly histamine. These mediators are responsible for the symptoms associated with eye allergies. Allergic conjunctivitis can produce two types of discharge, serous and mucoid. A serous discharge is watery, whereas, the mucoid discharge is stringy or ropy. Other symptoms include redness, tearing, swelling, burning, blurred vision, sensitivity to light, or a sensation of fullness in the eyelids. Ophthalmic antihistamines reduce the ocular symptoms and relieve the eye discomfort associated with allergic conjunctivitis.

Total program savings for the PDL classes will be regularly reviewed.

Program-Specific Information:

Preferred Agents	Non-Preferred Agents
<ul style="list-style-type: none"> Alaway® Ketotifen 10mL OTC Olopatadine 0.2% Rx Pazeo® 	<ul style="list-style-type: none"> Azelastine 0.05% Bepreve® Epinastine Ketotifen 5mL OTC Lastacraft® Olopatadine 0.1% Olopatadine 0.2% OTC Pataday® Patanol® Zaditor® Zerviate™

Type of Criteria: Increased risk of ADE
