

SmartPA Criteria Proposal

Drug/Drug Class:	Insulin, Mixed PDL Edit
First Implementation Date:	July 5, 2007
Proposed Date:	June 17, 2021
Prepared For:	MO HealthNet
Prepared By:	MO HealthNet/Conduent
Criteria Status:	<input checked="" type="checkbox"/> Existing Criteria <input type="checkbox"/> Revision of Existing Criteria <input type="checkbox"/> New Criteria

Executive Summary

Purpose: The MO HealthNet Pharmacy Program will implement a state-specific preferred drug list.

Why Issue Selected: Type 1 diabetes mellitus occurs when the body's immune system destroys the insulin-secreting beta cells of the pancreas. The management of type 1 diabetes has changed dramatically over the past 30 years. New insulin strategies have improved the ability to maintain near-normal glycemia. All insulin mixtures have demonstrated the ability to lower hemoglobin A1c. Efficacy and safety profiles are similar among these agents. Factors such as onset, peak, and duration of action can influence the ability of an insulin regimen to help control glucose levels. Patient factors, including individual variations in insulin absorption, levels of exercise and types of meals consumed, also influence the effectiveness of insulin regimens.

Total program savings for the PDL classes will be regularly reviewed.

Program-Specific Information:	Preferred Agents	Non-Preferred Agents
	<ul style="list-style-type: none"> Humalog® Mix 50/50™ KwikPen®/Vial Humalog® Mix 75/25™ KwikPen®/Vial Humulin® 70/30 Vial NovoLog® Mix 70/30 FlexPen®/Vial 	<ul style="list-style-type: none"> Humulin® 70/30 KwikPen® Insulin Aspart Protamine and Insulin Aspart FlexPen®/Vial Insulin Lispro Mix 75/25 KwikPen® Novolin® 70/30 FlexPen®/Vial ReliOn® Novolin® 70/30 FlexPen®/Vial

Type of Criteria: Increased risk of ADE
 Appropriate Indications

Preferred Drug List
 Clinical Edit

Data Sources: Only Administrative Databases

Databases + Prescriber-Supplied

Setting & Population

- Drug class for review: Insulin, Mixed
- Age range: All appropriate MO HealthNet participants

Approval Criteria

- Failure to achieve desired therapeutic outcomes with trial on 2 or more preferred agents
 - Documented trial period for preferred agents **OR**
 - Documented ADE/ADR to preferred agents

Denial Criteria

- Lack of adequate trial on required preferred agents
- Therapy will be denied if all approval criteria are not met

Required Documentation
