

# SmartPA Criteria Proposal

Drug/Drug Class:	Selective Serotonin Reuptake Inhibitor (SSRI) Step Therapy Edit	
First Implementation Date:	October 26, 2005	
Proposed Date:	September 16, 2021	
Prepared for:	MO HealthNet	
Prepared by:	MO HealthNet/Conduent	
Criteria Status:	⊠Existing Criteria □Revision of Existing Criteria □New Criteria	

### **Executive Summary**

Purpose: Ensure appropriate use of selective serotonin reuptake inhibitor (SSRI) agents

Why Issue Selected:

MO HealthNet will assess the usage of SSRI agents in the pharmacy program with a primary goal of patient safety. Participants may have multiple prescribers and/or multiple pharmacies caring for them and without a clinical edit it is almost impossible to prevent duplication within a drug class, dangerous drug interactions, or overmedication. By using medical evidence guidelines, this clinical edit can flag potentially dangerous duplicate and high dose therapy for SSRI agents. The edit helps to provide an "early warning alert" to the pharmacist filling the prescription and the prescribing physician. As always, if a provider wishes to override a denial for medically necessary reasons, a claim can be approved with further medical input through direct communication with the MHD Hotline.

## Program-Specific Information:

Type of Criteria:	☐ Increased risk of ADE	☐ Preferred Drug List
		⊠ Clinical Edit
Data Sources:	☐ Only Administrative Databases	

## Setting & Population

- Drug class for review: Selective serotonin reuptake inhibitor (SSRI) agents
- Age range: All appropriate MO HealthNet participants aged 5 years and older

### **Approval Criteria**

- Participant aged 5 years or older AND
- Documented compliance to current SSRI therapy regimen (90 days in the past 120 days) OR
- Documented adequate initial therapeutic intervention with 1 or more reference products (see Appendix A) OR
- Documented ADE/ADR to reference products
- Documented appropriate diagnosis required for:
  - Participants < 18 years of age OR</li>
  - Participants < 26 years of age who are also enrolled in foster care</li>

## **Denial Criteria**

- Therapy will be denied if all approval criteria are not met
- Claim exceeds maximum dosage limits (see Appendix B)
- Participants < 18 years of age: history of > 2 SSRI agents for more than 30 days in the past 90 days
- Participants ≥ 18 years of age: history of > 2 SSRI agents for more than 60 days in the past 90 days
- Participant is on more than one SSRI agent and one SNRI agent concurrently for more than 30 days

## **Disposition of Edit**

Denial: Exception code "0681" (Step Therapy)

Rule Type: CE

## Appendix A - SSRI reference products

- CITALOPRAM SOLN/TAB
- ESCITALOPRAM SOLN/TAB
- FLUOXETINE CAP/SOLN
- FLUOXETINE TAB 10 MG AND 20 MG
- FLUVOXAMINE TAB
- PAROXETINE TAB
- SERTRALINE SOLN/TAB

## Appendix B - Maximum Daily Dosage Limits

Generic Equivalent	Max Daily Dose
CITALOPRAM	60mg
ESCITALOPRAM	20mg
FLUOXETINE	80mg
FLUVOXAMINE	300mg
PAROXETINE	80mg
SERTRALINE	200mg
VILAZODONE	40mg
VORTIOXETINE	20mg
