Executive Summary

Purpose: Ensure appropriate utilization and control of botulinum toxin agents

Why Issue Selected: Botulinum toxin has been in use since the 1970s. Over the last few years utilization of botulinum toxin has expanded to a larger range of cosmetic and non-cosmetic approved indications. Three preparations of botulinum toxin type A (Botox®, Dysport® and Xeomin®) and one preparation of botulinum toxin type B (Myobloc®) are commercially available. Botox first earned FDA approval in 1989. Dysport and Myobloc were approved in 2009, and Xeomin was approved in 2010. The clinical effect of botulinum toxin is the result of a reversible inhibition of acetylcholine release which prevents contraction of muscle. The molecules and pharmacokinetics of the botulinum toxin products differ, making a straight conversion ratio of equivalent therapeutic doses difficult. MO HealthNet will edit botulinum toxin agents to ensure appropriate prescribing of these agents for non-cosmetic uses only.

Setting & Population

- Drug class for review: Botulinum toxin agents
- Age range: All appropriate MO HealthNet participants

Approval Criteria

- Diagnosis of blepharospasm:
 - For use of Botox:
 - Participant age \geq 12 years **AND**
 - Documented diagnosis of cervical dystonia torticollis
 - For use of Xeomin:
 - Participant age \geq 18 years **AND**
 - Documented therapeutic trial of Botox in the past year
- Diagnosis of upper limb spasticity:
 - For use of Botox **or Dysport**: Participant age \geq 2 years
 - For use of Xeomin:
 - **Participant age \geq 2 years AND**
 - Documented therapeutic trial of Botox or Dysport in the past year
- Diagnosis of lower limb spasticity:
 - **Participant age \geq 2 years AND**
 - **Botox or Dysport**
- Diagnosis of chronic sialorrhea
 - Participant age \geq 18 years **AND**
 - Xeomin or Myobloc
- Diagnosis of strabismus:
 - Participant age \geq 12 years **AND**
 - Botox only
- Diagnosis of cervical dystonia torticollis:
 - Participant age \geq 18 years **AND**
 - For use of Xeomin or Myobloc: therapeutic trial of Botox or Dysport in the past year
- Diagnosis of chronic migraine:
 - Participant age \geq 18 years **AND**
 - Botox only **AND**
 - If no previous history of Botox therapy in the past year:
 - Therapeutic trial of CGRP inhibitors **approved for prophylactic therapy** (90 days out of the past 150 days) **AND**
