

SmartPA Criteria Proposal

Drug/Drug Class:	Macrolides PDL Edit
First Implementation Date:	May 25, 2005
Proposed Date:	June 18, 2020
Prepared For:	MO HealthNet
Prepared By:	MO HealthNet/Conduent
Criteria Status:	□Existing Criteria ⊠Revision of Existing Criteria □New Criteria

Executive Summary

Purpose: The MO HealthNet Pharmacy Program will implement a state-specific preferred drug list.

Why Issue Selected:

Macrolide antibiotics reversibly bind to the P-site of the 50S ribosomal subunit of susceptible organisms and may inhibit RNA-dependent protein synthesis. They may be bacteriostatic or bacteriocidal, depending on such factors as drug concentration. There are currently four macrolides available in the U.S. They are all equally efficacious for the treatment of most community-acquired infections, but some have better tolerability and allow for once to twice daily dosing.

Total program savings for the PDL classes will be regularly reviewed.
