EDIT IMPLEMENTATION SCHEDULE

Clinical edits are designed to enhance patient care and optimize the use of program funds through the therapeutically prudent use of pharmaceuticals. Point-of-service pharmacy claims will be routed through an automated computer system to apply edits specifically designed to assure effective drug utilization. The edits are based on evidence-based clinical criteria and available nationally recognized peer-reviewed information. Through the clinical edit process, therapy will automatically and transparently be approved for those patients who meet any of the system approval criteria. For those patients who do not meet the system approval criteria, therapy will require a call to the MO HealthNet Drug Prior Authorization hotline at **(800) 392-8030** to initiate a review and potentially authorize claims. MO HealthNet will use the clinical edit program software to implement a state specific Preferred Drug List.
