

# SmartPA Criteria Proposal

<b>Drug/Drug Class:</b>	High Cost Medication Kits Fiscal Edit
<b>First Implementation Date:</b>	May 14, 2020
<b>Proposed Date:</b>	December 17, 2020
<b>Prepared for:</b>	MO HealthNet
<b>Prepared by:</b>	MO HealthNet/Conduent
<b>Criteria Status:</b>	<input type="checkbox"/> Existing Criteria <input checked="" type="checkbox"/> Revision of Existing Criteria <input type="checkbox"/> New Criteria

## Executive Summary

**Purpose:** Ensure appropriate control and utilization of high cost medication kits

**Why Issue Selected:** Initiation of certain drug therapies can be costly to a prescription drug benefit program, especially when comparable agents are available with similar ingredients at a much lower cost. Medication kits are defined as combinations of prescription medication with a medical supply or over the counter product in which the combination of these products far exceeds the total cost of each individual product. The use of excessively high cost medication kits solely for the convenience of either provider or participant is considered not medically necessary.

**Type of Criteria:**  Increased risk of ADE  Preferred Drug List  
 Appropriate Indications  Fiscal Edit

**Data Sources:**  Only Administrative Databases  Databases + Prescriber-Supplied

## Setting & Population

- Drug class for review: High cost medication kits
- Age range: All appropriate MO HealthNet participants

## Approval Criteria

- Therapy will be approved if all denial criteria are not met

## Denial Criteria

- Claim is for an agent screened by this edit – see Appendix A

## Required Documentation

Laboratory Results:  Progress Notes:
