What is a medical home?

Medical Homes Provide:

• comprehensive and coordinated care in the context of individual, cultural, and community needs
• Medical, behavioral, and related social service needs and supports are coordinated and provided by provider and/or arranged
• emphasize education, activation, and empowerment through interpersonal interactions and system-level protocols
• at the center of the medical home are the patients and their relationship with their primary care team
Missouri’s Health Homes

• Two health home initiatives in Missouri
  – Primary Care
    • Behavioral health care into the traditional primary care model through the addition of a behavioral health component
  – Behavioral Health
    • Primary care into the traditional behavioral health model

• Providers that meet the health home requirements will receive a Per-Member-Per-Month (PMPM) payment for performing health home services and activities (“touches”)

Patient Enrollment Eligibility for PCHH

- Participant must meet the following criteria:
  - MO HealthNet eligible
  - Not be locked into hospice
  - Not living in nursing home
  - PCHH organization must be PCP for enrollee
  - Patient not enrolled in another PCHH or CMHC Health Home
  - Meet spend-down, and/or pay any premiums due
  - Have paid/final claims (excluding original claims that were reversed/voided) with an approved PC diagnosis in one of the first five positions on a claim.
  - Have one of three stand alone qualifying conditions and/or two or more qualifying conditions/risk factors
  - Have at least $775 of MO HealthNet paid costs prior to enrollment
Missouri PCHH Qualifying Conditions

- **Combination of Two**
  - Diabetes (CMS approved to stand alone as one chronic disease and risk for second)
  - Heart Disease, including hypertension, dyslipidemia, and CHF
  - Asthma
  - Overweight/Obesity (BMI ≥ 25 or 85<sup>th</sup> percentile)
  - Tobacco Use
  - Developmental Disabilities
  - Pediatric Asthma**
  - Obesity (BMI ≥ 30 or 95<sup>th</sup> percentile)**

- **Behavioral Health Conditions (only one of these)**
  - Anxiety
  - Depression
  - Substance Use Disorder*

*must have at least one provider certified to provide medication-assisted treatment

**stand-alone conditions – must meet certain criteria
Missouri PCHH Updated Qualifying Conditions

Proposed to begin later in 2019 (conditional on CMS approval of SPA)

- Chronic Pain (condition and risk factor)
  - Chronic Pain is pain that lasts past the time of normal tissue healing. Risk stratification for severity of pain, as well as for worsening condition and/or opioid dependency will be incorporated into eligibility. Qualified participant eligibility shall be limited to chronic non-cancer neck and back pain, chronic pain post trauma, (i.e., motor vehicle collision), and others as determined medically necessary through a prior approval process.
  - The criteria for the risk of developing another chronic condition includes chronic pain that can lead to other problems in individuals, such as substance use disorder, overweight/obesity, depression, anxiety, or low self-esteem.

Goals of the Primary Care Health Home Initiative

- Reduce inpatient hospitalization, readmissions and inappropriate emergency room visits
- Improve coordination and transitions of care
- Improve clinical indicators (e.g. A1C, LDL, blood pressure)
- Implement and evaluate the Health Home model as a way to achieve accessible, high quality primary health care and behavioral health care;
- Demonstrate cost-effectiveness in order to justify and support the sustainability and spread of the model; and
- Support primary care and behavioral care practice sites by increasing available resources and improving care coordination to result in improved quality of clinician work life and patient outcomes.
• Hospitalization and ER visit notifications
• High utilizers (reports and graphs)
• CyberAccess usage (detail and summary)
• Possible PCHH enrollees
• Monthly enrollment/discharge list
• Payment rejects
• Staffing/payment comparisons
• Retrospective payments
• Managed care participants
Health Home Services/Attestation

Comprehensive care management

• Review of medical records
  – Pre Planning visits
• Review of Cyberaccess claims
• Meet with patient during office visits
• Huddles with team to discuss care
• Care plan development including patient goals, preferences and optimal clinical outcomes
• Address barriers to learning
• Utilizing EMR and other Population Health tools to manage and track chronic disease management goals

NOTE: Touches must be documented—best practice documentation in EMR
Health Home Services/Attestation

Care Coordination

• Appropriate linkages, referrals, coordination and follow-up as needed
  – Assist pt with scheduling appointments
  – Setting up referral appointments
  – Closing transition of care loop
Health Home Services/Attestation

Health Promotion

• Providing health education specific to an individuals:
  – Chronic condition
  – Development of self-management goals/plans
• Assist patient to find group classes, or lead group classes
  – Tobacco cessation
  – Diabetes
  – Exercise
• Age Appropriate screenings and immunizations

NOTE: Newsletters or other educational materials can be used if they are targeted to a person’s specific conditions.
Health Home Services/Attestation

Comprehensive Transitions of Care

• Comprehensive transitional care including follow-up from inpatient and other settings – **Medication Reconciliation**

• Review hospitalization certification reports from MHN and f/u as necessary

• F/u with outside support services
Health Home Services/Attestation

Patient and Family Support

- Identify resources
- Advocating for patients and families, assist with obtaining medication and other treatment supplies.
- Discuss caregiver role, encourage BHC
Referral to Community and Support Services

- Home health visits and DME supplies medication and other treatment supplies
- Assist with paperwork for housing, healthcare coverage, etc.
- Transportation, housing, food securities, work with CHW on barriers and needs
Care Team

Care Coordinator
RN/LPN/MA
Provider
RN Care Manager
BHC
CHW
IT
Specialist
Admin
Health Home Director
Four Required Health Home Team Members

• Health Home Director (1 FTE: 2500 Enrollees)
• Nurse Care Manager (1 FTE: 250 Enrollees)
• Behavioral Health Consultant (1 FTE: 750 Enrollees)
• Care Coordinator (1 FTE: 750 Enrollees)
• Physician Champion

__________________

• Administration
• Information Technology
Health Home Director

- Provides leadership for the implementation and coordination of health home activities
- Coordinates activities of other health home staff
- Champions practice transformation based on health home principles
- Monitors health home performance and leads improvement efforts
- Training and technical assistance
- Data management and reporting
- Assist with enrollment/discharge processing
Nurse Care Manager

• Direct relationships with patients and coordination with primary care team, specialty care teams, and inpatient facilities.
  – Visit 1:1 with patients in clinic
  – Contact via portal or phone
  – Educational/outreach programs

• Develop care plans that are patient driven and must be documented in EMR and updated at least once per year

• Utilize MHD health technology programs & initiatives (i.e., CyberAccess)
  • Medication adherence reporting

• Track patient progress, review labs, triage calls, provide education
Nurse Care Manager

• Utilize DRVS and other reports provided by MHD to identify gaps in care and needed services for enrollees
• Address medication alerts, hospital admissions/discharges and ER visits - including medication reconciliation
• Identify and address high utilizers
• Monitor & report performance measures & outcomes
  • Updates team on progress
Behavioral Health Consultant

- Requires LCSW, Clinical Psychologists and/or individuals that are working towards certification and are currently in clinical supervision
- Focus on managing a population of patients versus specialty care
- Support care team in identifying and behaviorally intervening with patients to improve their physical health condition
- **Assist with high utilizers**
  - Behavioral supports to assist individuals in improving health status and managing chronic illnesses
  - Assistance with medication adherence, treatment plan adherence, self management support/goal setting, and facilitate group classes
  - Brief interventions for individuals with behavioral health problems (not long term hour long therapy sessions)
  - Brief coaching sessions for SBIRT
Care Coordinator

• This role does not stipulate a specific licensure requirement as the nurse care manager however many health homes have found it helpful to have someone with clinical knowledge such as a LPN or MA in this role.
• Assist with referral tracking and feedback
• Assist with performance improvement and data management.
• Process enrollment/discharge/transfer forms
• Provide assistance with enabling services such as transportation, food, housing, etc.
  – Utilize CHW to assist
• Reminding enrollees regarding keeping appointments, filling prescriptions, follow-up on self-management goals, etc.
• Requesting and sending medical records for care coordination
Physician Champion

• Serves in a leadership capacity promoting and implementing the health home and medical home model
• Creates the strategic vision and drives the investment necessary to create the needed PCMH infrastructure
• Participates in health home planning meetings and activities
• Participates in development and maintenance of health home program structure and policies
• Promotes health/medical home transformation to all physicians
• Works with physicians who resist changes resulting from transition to the health home/medical home model
• Review data showing results of health home implementation
2019 Primary Care Health Home Performance Measures

1. Adult Hypertension Controlling High Blood Pressure (NQF 0018)

2. Childhood Weight Screening and Counseling
   1. Child Weight Screening / BMI (NQF 0024)
   2. Child Weight Screening / Nutritional Counseling (NQF 0024)
   3. Child Weight Screening / Physical Activity (NQF 0024)

3. Pediatric and Adult Asthma Controller Medication Ages 5-64 (CMS126v5):
   1. Use of Appropriate Medications for Asthma Ages 5-11 (NQF 0036)
   2. Use of Appropriate Medications for Asthma Ages 12-18 (NQF 0036)
   3. Use of Appropriate Medications for Asthma Ages 19-50 (NQF 0036)
   4. Use of Appropriate Medications for Asthma Ages 51-64 (NQF 0036)

4. Adult Diabetes A1c > 9 (NQF 0059)

5. Adult Diabetes A1c < 8 (NQF 0059 modified)

6. Adult Diabetes BP < 140/90 (NQF 0059 modified)

7. Screening for Clinical Depression and Follow-Up Plan (NQF 0418)
   1. Ages 12-17
   2. Ages 18 and older

8. Adult BMI Screening and Follow-up (NQF 0421)

9. Care Coordination (MPCA PCHH)
   1. Ages 3-17
   2. Ages 18 and older

10. Adult SBIRT Substance Abuse Screening and Follow Up (MPCA PCHH)
    1. Adult SBIRT Drug Use (MPCA PCHH)
    2. Adult SBIRT Excessive Drinking (MPCA PCHH)

11. Statin Therapy for Prevention & Treatment of CVD (CMS Prev-13)

Structured vs. Unstructured Data

There is tremendous value in recording data using a common vocabulary and methodology. Creates data which can be recognized, ordered, analyzed, reported & shared.

Data not captured in structured fields is not reportable

**UNSTRUCTURED DATA**
- Dictation
- Transcription
- Voice recognition typing
- Free text
- Memo fields

**STRUCTURED DATA**
- Radio buttons
- Locked down Pick-lists
- Checkboxes
- NDC-ID (Meds)
- ICD-9/10/SNOMED(Dx)
- LOINC (Labs)
- CPT (Procedures)
Medication Adherence Reports

- Delivered by MPCA data team
- Measures medication adherence
- Percentage of time patient has access to their medications
  Research indicates that an MPR of 0.8 or higher (medications available 80% of the time) is adequately adherent
- This allows for a few days gap between refills

Drug MPR =
\[
\frac{\text{# of days of supply dispensed to patient}}{\text{# of total days in time period}}
\]
What to do with MPRs?

• Identify patients with difficulty refilling medications as prescribed
  – Intervene, consider using BHC to help with compliance
  – Discuss alternatives/care plan modification

• Patients who just got a refill
  – Low MPRs should be investigated EVEN IF the patient recently refilled the medication, potential adherence issue
  – Low MPRs indicate an adherence issue that should be addressed
MPRs in CyberAccess and ProAct

• Not all MPRs are created equal
• CyberAccess and ProAct calculate MPRs differently
  – CyberAccess uses a 1-year period of time
  – CyberAccess will identify claims in real time (or up to 1 day)
  – ProAct uses a 90-day period of time, paid pharmacy claims
• A shorter period of time is best for intervening with current adherence problems
PCHH Practice Transformation Coaching
MPCA PCHH Practice Coach Enhanced Approach and Goals

- MO HealthNet has partnered with MPCA to provide the practice coach support provided to PCHH organizations.
- MO HealthNet Goals and Desired Results of Practice Coaching:
  - Advance practice transformation for services provided to PCHH enrollees
  - Enhanced team-based care at participating PCHH organizations
  - Improved Clinical Outcomes of PCHH enrollees at individual provider organizations and collectively across the initiative
  - Support cost savings efforts of PCHH organizations with special focus on high utilizers of the emergency room and in-patient
  - Improved Population Health of PCHH enrollees
  - Technical assistance and training that meets the needs of individual PCHH organizations and PCHH organizations collectively
MPCA PCHH Practice Coach Focus Areas

• Advancing Team-based Care
• Care Coordination and Management
  • High utilizers of hospital and emergency room
• Patient Engagement in Care
• Performance Improvement and Data Driven Decision Making
• Population health management
• Quality improvement
• Practice transformation for Patient Centered Medical Home
Interactions with MPCA Practice Coach

- Monthly meetings via Zoom with Health Home Director and team
- Monthly outreach via e-mail including scorecard, practice ranking, medication adherence, other tools/resources
- Telephone, email, Zoom support as needed/requested
- Regular training opportunities: Coach bulletins, webinars, and in-person (care team forum, regional BHC meetings, regional Nurse Care Manager meetings)
- Annual site visit with PCHH team
- PDSA cycle support to drive performance improvement of PCHH measures
- PCHH Practice Transformation work plan development and implementation
