Executive Summary

**Purpose:** The MO HealthNet Pharmacy Program will implement a clinical edit.

Some oral oncology agents are expensive and have serious side effects. The 15 day oral oncology program allows providers and participants to try these expensive medications that have serious side effects for a shorter amount of time so they can confirm effectiveness and tolerability prior to paying for a full 30-day supply, minimizing unnecessary expense, as well as medication waste. This program is for participants who are new starts only.

**Setting & Population:** All patients

**Type of Criteria:**
- [ ] Increased risk of ADE
- [ ] Non-Preferred Agent
- [ ] Appropriate Indications
- [ ] Only administrative databases
- [ ] Databases + Prescriber-supplied

**Setting & Population**
- Drug/drug class for review: Oral Oncology Agents
- Age range: All patients
### Approval Criteria

- Prescription claim with a calculated allowed amount of less than $150.00, OR
- Prescription claim with calculated allowed amount greater than $150 and a supply of less than or equal to 15 days OR
