## Executive Summary

**Purpose:** To control expenditures on expensive drug therapies by setting a day supply limitation for newly initiated oral oncology agents

**Why Issue Selected:** Oral oncology agents are generally expensive, and many have serious side effects. The 15 Day Supply - Oral Oncology Fiscal Edit requires providers and participants to initiate these expensive medications that have serious side effects for a shorter amount of time; this allows the provider to confirm effectiveness and tolerability prior to MO HealthNet paying for a full 30-day supply, minimizing unnecessary expense, as well as medication waste. This program is for participants who are new starts to therapy only. Oral oncology agents with special packaging restrictions that require dispensing in the original container are excluded from this edit.

**Type of Criteria:**  Increased risk of ADE  Preferred Drug List
