SmartPA PDL Proposal Form

Drug/Drug Class: Antiemetic THC Derivative Agents PDL Edit
First Implementation Date: April 4, 2019
Revised Date: April 2, 2020
Prepared For: MO HealthNet
Prepared By: MO HealthNet/Conduent
Criteria Status: ☒ Existing Criteria

Executive Summary

Purpose: The MO HealthNet Pharmacy Program will implement a state-specific preferred drug list.

Why Issue Selected: The Tetrahydrocannabinol (THC) derivative agents have indications that include prevention and treatment of nausea and vomiting associated with chemotherapy. Dronabinol and Marinol also have an indication for treating anorexia in patients with AIDS. The management of chemotherapy-induced nausea and vomiting is a critical aspect of treating cancer patients. The THC derivative agents are controlled substances and therefore need to be managed appropriately.

Total program savings for the PDL classes will be regularly reviewed.

Type of Criteria: ☒ Preferred Drug List

Data Sources: ☒ Databases + Prescriber-Supplied

Setting & Population

- Drug class for review: Antiemetic THC Derivative Agents
- Age range: All appropriate MO HealthNet participants

Approval Criteria

- Failure to achieve desired therapeutic outcomes with a trial on 1 or more preferred agents
  o Documented trial period for preferred agents (2 claims in 90 days) OR
  o Documented ADE/ADR to preferred agents
Denial Criteria

- Lack of adequate trial on required preferred agents
- Therapy will be denied if no approval criteria are met

Required Documentation
