Drug/Drug Class: Beta Adrenergic Agents – Long Acting PDL Edit
First Implementation Date: November 10, 2004
Revised Date: July 9, 2020
Prepared For: MO HealthNet
Prepared By: MO HealthNet/Conduent
Criteria Status: ☒ Existing Criteria

Executive Summary
Purpose: The MO HealthNet Pharmacy Program will implement a state-specific preferred drug list.
Why Issue Selected: Long-acting beta-agonists open the airways by relaxing smooth muscle around the airways. They do not decrease inflammation of pulmonary tissues and are often used with inhaled steroids as a long-term control medication to open the airways in people with moderate to severe asthma.

Total program savings for the PDL classes will be regularly reviewed.

Program-Specific Information:
