

# SmartPA Criteria Proposal

<b>Drug/Drug Class:</b>	Diabetic Supply Quantity Limit Fiscal Edit
<b>First Implementation Date:</b>	March 1, 2019
<b>Revised Date:</b>	May 20, 2021
<b>Prepared for:</b>	MO HealthNet
<b>Prepared by:</b>	MO HealthNet/Conduent
<b>Criteria Status:</b>	<input checked="" type="checkbox"/> Existing Criteria <input type="checkbox"/> Revision of Existing Criteria <input type="checkbox"/> New Criteria

## Executive Summary

**Purpose:** To control expenditures by setting quantity limits on diabetic supplies

**Why Issue Selected:** Government research has indicated that blood glucose test strips have a limited benefit for many patients who do not take insulin to manage their diabetes. Also, as of April 2020, MO HealthNet now covers continuous glucose monitors (CGMs) for qualifying participants, decreasing the reliance on frequent blood glucose testing for many participants. Urine ketone test strips may be used to determine if a participant is producing ketones due to a ketogenic diet or diabetic ketoacidosis. MO HealthNet desires to provide diabetic supplies to all qualifying participants, and as such, it is fiscally advantageous for MO HealthNet to establish limits to the number of urine ketone test strips it will reimburse for patients, as well as to continue limits for blood glucose test strips.

Program-Specific Information:	Date Range FFS 10-01-2019 to 9-30-2020			
	Drug	Claims	Spend	Avg Spend per Claim
	BLOOD GLUCOSE TEST STRIPS	76,900	\$9,994,151.25	\$130.11
	URINE KETONE TEST STRIPS	1,403	\$41,563.60	\$27.26

**Type of Criteria:**  Increased risk of ADE  Preferred Drug List  
 Appropriate Indications  Fiscal Edit

**Data Sources:**  Only Administrative Databases  Databases + Prescriber-Supplied

## Setting & Population

- Drug class for review: Blood Glucose Test Strips and Urine Ketone Test Strips
- Age range: All appropriate MO HealthNet participants

## Approval Criteria

- For urine ketone test strips: max 100 test strips every 75 days

- For blood glucose test strips:
  - Documented history of a continuous glucose monitor (CGM) in the past 120 days: max 100 test strips every 75 days **OR**
  - No documented history of a continuous glucose monitor (CGM) in the past 120 days:
    - Participants ≤ 18 years of age: max 900 test strips every 75 days
    - Participant > 18 years of age:
      - Currently pregnant: max 350 test strips every 75 days
      - Insulin Dependent: max 400 test strips every 75 days
      - Non-Insulin Dependent: max 100 test strips every 75 days

## Denial Criteria

- Therapy will be denied if all approval criteria are not met

## Required Documentation

Laboratory Results:		Progress Notes:	
MedWatch Form:		Other:	<b>X</b>

## Disposition of Edit

Denial: Exception code “0234” (Dose Optimization)  
 Rule Type: PD

## Default Approval Period

1 year
