Executive Summary

Purpose: Ensure appropriate utilization and control of Entresto® (sacubitril/valsartan)

Why Issue Selected: Entresto® is a combination product (ARNI) containing sacubitril, a neprilysin inhibitor, and valsartan, an angiotensin II receptor blocker (ARB). Entresto was first FDA approved in July 2015 and was indicated for adults with chronic heart failure (NYHA Class II – IV) and reduced ejection fraction (HFrEF). In October 2019 Entresto gained approval for pediatric patients aged 1 year and older with symptomatic heart failure with left ventricular systolic dysfunction; approval was based on demonstrated reductions in the cardiac biomarker N-terminal pro-B-type natriuretic peptide (NT-proBNP). In February 2021 Entresto gained FDA approval for a broader indication of chronic heart failure in adults, which covers heart failure patients with both reduced and preserved left ventricular ejection fractions (HFrEF/HFpEF). The 2021 Update to the 2017 ACC Expert Consensus Decision Pathway for Optimization of Heart Failure Treatment lists ARNIs as the preferred agents for treatment of heart failure with reduced ejection fraction, with or without prior aldosterone antagonist or ACEI/ARB therapy. Entresto is commonly prescribed with other heart failure medications including evidence-based beta-blockers, aldosterone antagonists, SGLT2 inhibitors, and diuretics. Due to the high cost and specific approved indications, MO HealthNet will impose clinical criteria to ensure appropriate utilization of Entresto.

Setting & Population

- Drug class for review: Entresto® (sacubitril/valsartan)
- Age range: All appropriate MO HealthNet participants **aged 1 year and older**

Approval Criteria

- ~~Documented history of previous therapy with Entresto in the past 60 days OR~~
- ~~Documented diagnosis of heart failure, NYHA class II–IV, with systolic dysfunction AND~~
- ~~Documented ejection fraction \leq 40% AND~~
- ~~Documented therapy with an ACE inhibitor or ARB for 60 of the past 90 days~~
- Documented diagnosis of heart failure

Denial Criteria

- Therapy will be denied if all approval criteria are not met
