

# **SmartPA Criteria Proposal**

Drug/Drug Class:	Antibiotics, Mupirocin Topical PDL Edit	
First Implementation Date:	October 14, 2021	
Revised Date:	TBD	
Prepared For:	MO HealthNet	
Prepared By:	MO HealthNet/Conduent	
Criteria Status:	<ul> <li>□Existing Criteria</li> <li>□Revision of Existing Criteria</li> <li>⊠New Criteria</li> </ul>	

#### **Executive Summary**

Purpose: The MO HealthNet Pharmacy Program will implement a state-specific preferred drug list.

Why Issue The antibiotic mupirocin, also known as pseudomonic acid A, was first extracted from Selected: Pseudomonas fluorescens, a gram-negative, rod-shaped bacterium in 1971. Mupirocin exerts its effect of bacterial protein synthesis inhibition via reversible binding to bacterial isoleucyl-transfer RNA (tRNA) synthetase. It is most highly active against gram-positive bacteria including staphylococci and streptococci and has little activity against gram-negative bacteria. In 1987 mupirocin was initially available as Bactroban® ointment. All brand name Bactroban products have since been discontinued including the nasal ointment formulation which was available in singleuse tubes for the eradication of nasal colonization with methicillin-resistant Staphylococcus aureus (MRSA) to reduce the risk of infection among high-risk patients during institutional outbreaks. Remaining available formulations include creams and ointments which are commonly used for the treatment of impetigo and other skin and skin structure infections due to susceptible strains of Staphylococcus aureus or Streptococcus pyogenes. Documentation of resistance has been noted and limiting duration of therapy to 10 days in most cases is recommended.

Total program savings for the PDL classes will be regularly reviewed.

Program-Specific	Preferred Agents	Non-Preferred Agents
Information:	Mupirocin Oint	Centany <sup>®</sup>
		Centany <sup>®</sup> AT Oint Kit
		Mupirocin Crm
Type of Criteria:	Increased risk of ADE	Preferred Drug List
	Appropriate Indications	Clinical Edit

### **Approval Criteria**

- Failure to achieve desired therapeutic outcomes with trial of 1 preferred agent in the past 3 months

   Documented trial period of preferred agents
  - Documented ADE/ADR to preferred agents

#### **Denial Criteria**

- Lack of adequate trial on required preferred agents
- Therapy will be denied if all approval criteria are not met

#### **Required Documentation**

Laboratory Results: MedWatch Form: Progress Notes: Other:

#### **Disposition of Edit**

Denial: Exception Code "0160" (Preferred Drug List) Rule Type: PDL

#### Default Approval Period

1 year
