

SmartPA Criteria Proposal

Drug/Drug Class:	Antiparasitics, Topical PDL Edit
First Implementation Date:	August 15, 2013
Revised Date:	July 7, 2022
Prepared For:	MO HealthNet
Prepared By:	MO HealthNet/Conduent
Criteria Status:	<input type="checkbox"/> Existing Criteria <input checked="" type="checkbox"/> Revision of Existing Criteria <input type="checkbox"/> New Criteria

Executive Summary

Purpose: The MO HealthNet Pharmacy Program will implement a state-specific preferred drug list.

Why Issue Selected: Pediculosis is an infestation of lice, tiny parasites that feed on blood and live in the skin or scalp of warm-blooded animals including humans. They lay their eggs and deposit waste matter on the skin, clothing, or scalp. Lice infestation presents with severe itching and usually leaves red bumps on the skin or scalp. About 6-12 million people, mainly children, are treated for head lice in the United States annually. Head lice infestation is most frequent in children ages 3-11 years and their families. Females are more frequently infested than males. Head lice are spread through direct head-to-head contact with an infested person. There is no product or method which assures 100% destruction of the eggs and hatched lice after a single treatment, however there are several treatment modalities that can be used.

Total program savings for the PDL classes will be regularly reviewed.

Program-Specific Information:	Preferred Agents	Non-Preferred Agents
	<ul style="list-style-type: none"> Natroba™ Nix® Ultra Solution Permethrin OTC/Rx Crm Piperonyl butoxide/Pyrethrin (gen Rid® Shampoo OTC) Piperonyl butoxide/Pyrethrin/Permethrin (gen Rid® Lice Complete Kit OTC) VanaLice™ OTC 	<ul style="list-style-type: none"> Crotan™ Elimite™ Eurax® Ivermectin Lot OTC/Rx Lindane Malathion Lot Ovide® Sklice® Spinosad

Type of Criteria: Increased risk of ADE Preferred Drug List
 Appropriate Indications Clinical Edit
