SmartPA Criteria Proposal

**Drug/Drug Class:** Equetro Clinical Edit  
**First Implementation Date:** January 18, 2006  
**Revised Date:** February 17, 2022  
**Prepared for:** MO HealthNet  
**Prepared by:** MO HealthNet/Conduent  
**Criteria Status:**  
☐ Existing Criteria  
☒ Revision of Existing Criteria  
☐ New Criteria

### Executive Summary

**Purpose:** Ensure appropriate utilization and control of Equetro® (extended-release carbamazepine)

**Why Issue Selected:** Equetro® is an extended-release carbamazepine product formulated with immediate-release, extended-release, and enteric coated beads combined in a specific ratio to facilitate twice daily dosing. Other forms of extended-release carbamazepine include Tegretol®-XR and Carbatrol®; both are formulated for twice daily dosing, available generically, and are approved for use as an anticonvulsant and for treatment of pain associated with trigeminal neuralgia. Equetro is currently only available as a brand name product; it also is approved for use as an anticonvulsant and for treatment of pain associated with trigeminal neuralgia, but also has an indication for the treatment of acute manic or mixed episodes associated with bipolar I disorder which other extended-release carbamazepine agents lack. Equetro is available in three strengths: 100mg, 200mg, and 300mg capsules. Generic Tegretol-XR is available in 100, 200, and 400mg tablets. Generic Carbatrol is available in 100, 200, and 300mg capsules. Equetro is roughly 3 - 6 times more expensive than the generic extended-release carbamazepine products.

Approval Criteria

- Documented compliance to previous Equetro therapy (defined as 90 in the past 120 days) OR
- Documented diagnosis of acute manic or mixed episodes associated with bipolar I disorder AND
- Documented trial of another carbamazepine agent in the past 45 days

Denial Criteria

- Therapy will be denied if all approval criteria are not met

Required Documentation

- Laboratory Results:
- Progress Notes:
- MedWatch Form:
- Other:
- X

Disposition of Edit

Denial: Exception code “0682” (Clinical Edit)
Rule Type: CE

Default Approval Period

1 year
