Executive Summary

Purpose: To control expenditures on products manufactured by pharmaceutical manufacturers that do not pay their required statutory rebates.

Why Issue Selected: State Medicaid programs rely on drug manufacturers to pay their required statutory rebates in order to help offset costs, resulting in lower net costs to the State Medicaid program and taxpayers. When manufacturers delay or fail to pay these required statutory rebates the net cost of medications increases. In order to ensure MO HealthNet is not paying higher net costs for drugs, a Prior Authorization will be required on products from manufacturers who show a pattern of delaying or failing to pay statutory rebates in the timeframe outlined in 42 U.S.C. 1396r-8.

Type of Criteria: Increased risk of ADE Preferred Drug List
 Appropriate Indications Fiscal Edit
