SmartPA Criteria Proposal

Drug/Drug Class: Multiple Sclerosis Agents, Injectable PDL Edit
First Implementation Date: January 6, 2011
Revised Date: October 14, 2021
Prepared For: MO HealthNet
Prepared By: MO HealthNet/Conduent
Criteria Status: ☐ Existing Criteria
☒ Revision of Existing Criteria
☐ New Criteria

Executive Summary

Purpose: The MO HealthNet Pharmacy Program will implement a state-specific preferred drug list.

Why Issue Selected: Multiple sclerosis (MS) is an inflammatory demyelinating disease of the central nervous system that is associated with many chronic symptoms. MS is an immune-mediated disorder of acute, repeated episodes of inflammation causing the destruction of the myelin sheath and axonal loss. This process leads to chronic multifocal sclerotic plaques and eventually, progressive neurological dysfunction. Multiple sclerosis is the most common cause of neurological disability in young adults, affecting 250,000 to 350,000 people in the U.S. The lifetime risk of MS is 1 in 400. MS affects twice as many women as men, as is often observed in autoimmune diseases. Multiple sclerosis agents are used to reduce the frequency of relapses and slow disease progression. Most agents are FDA approved for the treatment of relapsing forms of MS. However, Ocrevus™ (ocrelizumab) is also approved for primary progressive MS. The American Academy of Neurology does not recommend a specific first-line agent for MS and state participant factors regarding safety, route of administration, cost, and efficacy should be considered when deciding which agent to initiate.

Total program savings for the PDL classes will be regularly reviewed.

Setting & Population

- Drug class for review: Multiple Sclerosis Agents, Injectable
- Age range: All appropriate MO HealthNet participants

Approval Criteria

- Documented compliance on current therapy regimen OR
- Failure to achieve desired therapeutic outcomes with trial on 2 or more preferred agents by one or more of the following:
  - 1 or more relapses
  - 1 or more new MRI lesions
  - Participant demonstrates increased disability on a clinical rating scale such as the Expanded Disability Status Scale (EDSS) or the Functional Systems Score (FSS)
  - Documented ADE/ADR to preferred agents OR
- For Ocrevus:
  - Documented diagnosis of primary progressive MS in the past 6 months AND
  - Documented trial on 1 injectable biologic agent (6 months)

Denial Criteria

- Lack of adequate trial on required preferred agents
- Therapy will be denied if all approval criteria are not met

Required Documentation

Disposition of Edit

Denial: Exception Code “0160” (Preferred Drug List)
Rule Type: PDL

Default Approval Period

1 year
