First Implementation Date:	November 5, 2010

Executive Summary

Purpose: Ensure appropriate and prudent use psychotropic medications

Why Issue MO HealthNet will assess the usage of psychotropic agents in the pharmacy program selected: with a primary goal of patient safety in regard to polypharmacy or use of more drugs

than is medically necessary. Participants may have multiple prescribers and/or multiple pharmacies caring for them, and, by using medical evidence guidelines, this clinical edit

can flag potentially dangerous duplication within drug classes, dangerous drug

interactions, or overmedication. The edit helps to provide an "early warning alert" to the pharmacist filling the prescription and the prescribing physician. As always, if a provider wishes to override a denial for medically necessary reasons, a claim can be approved

with further medical input through direct communication with the MHD Hotline.

Type of Criteria:
☐ Increased risk of ADE ☐ Preferred Drug List

☐ Appropriate Indications ☐ Clinical Edit

Data Sources:
