## SECTION 7 FAMILY PLANNING SERVICES

Family planning is defined as any medically approved diagnosis, treatment, counseling, drug, supply, or device prescribed or furnished by a provider, including local health departments, to individuals of child-bearing age to enable such individuals to freely determine the number and spacing of their children.

When billing family planning services, a health department must:

- Use a diagnosis code in the range of V25 through V25.9; and
- Enter "F" in field 24H on the CMS-1500 or the appropriate field if billing electronically.

#### **COVERED SERVICES**

A local health department may bill as a family planning service the appropriate office visit code which includes one or more of the following services.

- Obtaining a medical history
- A pelvic examination
- The preparation of smears such as a Pap Smear
   Note: Obtaining a specimen for a Pap smear is included in the office visit.
   Screening and interpretation of a Pap smear can be reimbursed only to a clinic or certified independent laboratory employing an approved pathologist, or to an individual pathologist.
- A breast examination
- All laboratory and x-ray services provided as part of a family planning encounter are payable as family planning services.
- A pregnancy test would be family planning related if provided at the time at which family planning services are initiated for an individual, at points after the initiation of family planning services where the patient may not have properly used the particular family planning method, or when the patient is having an unusual response to the family planning method.
- HIV blood screening testing performed as part of a package of screening testing and counseling provided to women and men in conjunction with a family planning encounter is reimbursable as a family planning service.

### **Billing for Birth Control Devices and Systems**

Physicians, nurse practitioners, nurse midwives, clinics, FQHCs, and local health departments must bill for birth control devices electronically. The only exceptions are diaphragms and cervical caps.

A provider must submit a claim for a birth control device or system on an electronic Professional ASC X12N 837 Health Care claim transaction or by manually entering a claim at MO HealthNet's billing web site, www.emomed.com utilizing the Pharmacy Claim form option. The system automatically generates a claim for the NDC to process as a pharmacy claim and will appear as a separate claim on the provider's Remittance Advice.

This is the same method currently used by physicians when billing for injectables dispensed in the office or clinic.

# COPPER INTRAUTERINE DEVICE (IUD), LEVONORGESTREL-RELEASING INTRAUTERINE CONTRACEPTIVE SYSTEM, VAGINAL RING, AND DEPOPROVERA INJECTION

Physicians, nurse practitioners, nurse midwives, clinics, FQHCs and local health departments must bill for these items using the National Drug Code (NDC) on the electronic Professional ASC X12N 837 Health Care claim transaction, by entering an electronic CMS-1500 claim on MO HealthNet's billing website, emomed.com, or using the Pharmacy Claim form on emomed.com.

The fee for procedure code 58300 (insertion of IUD) covers insertion of the IUD. The appropriate office visit procedure code may be billed for the removal of the IUD. (Procedure code 58301 is not a billable procedure as payment for the service is included in the office visit procedure code.)

#### DIAPHRAGMS OR CERVICAL CAPS

The fitting of a diaphragm or cervical cap is included in the fee for an office visit procedure code. The cost of the diaphragm can be billed using procedure code A4266. The cost of the cervical cap can be billed using procedure code A4261. An invoice indicating the type and cost of the items must be submitted with claims for these services for manual pricing.

Physicians, nurse practitioners, nurse midwives, clinics, FQHCs and local health departments can bill for these items using the National Drug Code (NDC) on the electronic Professional ASC X12N 837 Health Care claim transaction, by entering an electronic CMS-1500 claim on MO HealthNet's billing website, emomed.com, or using the Pharmacy Claim form on emomed.com. An invoice of cost is not required if billed using the NDC.

#### IMPLANTABLE CONTRACEPTIVE CAPSULE SYSTEM

Physicians, nurse practitioners, nurse midwives, clinics, FQHCs and local health departments must bill for these items using the National Drug Code (NDC) on the electronic Professional ASC X12N 837 Health Care claim transaction, by entering an electronic CMS-1500 claim on MO HealthNet's billing website, emomed.com, or using the Pharmacy Claim form on emomed.com.

The following procedure codes are for insertion only, removal only, or removal with reinsertion only and do not include reimbursement for the system.

11976 - removal, implantable contraceptive capsules

11981 – insertion, non-biodegradable drug delivery implant

11982 – removal, non-biodegradable drug delivery implant

11983 – removal with reinsertion, non-biodegradable drug delivery implant

An office visit code may not be billed in addition to any of the above procedure codes.

#### **STERILIZATIONS**

A *Sterilization Consent* form is a required attachment for all claims containing the following procedure codes: 55250, 58565, 58600, 58605, 58611, 58615, 58670, and 58671. **The MO HealthNet participant must be at least 21 years of age at the time the consent is obtained and be mentally competent.** The participant must have given informed consent voluntarily in accordance with Federal and State requirements.

The Sterilization Consent form must be completed and signed by the participant at least **31** days, but not more than **180** days, prior to the date of the sterilization procedure. There must be **30** days between the date of signing and the surgery date. The day after the signing is considered the first day when counting the 30 days. There are provisions for emergency situations (reference Section 10.2.E (1) of the MO HealthNet Provider Manual available on the Internet at www.dss.mo.gov/mhd/providers/index.htm).

The *Sterilization Consent Form* can be submitted also through the emomed Internet web site. The provider must still maintain a properly completed paper form in the patient's files and must provide a copy of the paper form to the hospital if the service was performed in the hospital.

**Essure** - The Essure procedure is a permanent birth control alternative without incisions into the abdomen and any sutures or long postoperative recovery period. Essure is a device that is inserted into each fallopian tube which once incorporated into the fallopian tube, causes a localized tissue reaction. The body tissue grows into the micro-inserts, blocking the fallopian tubes.

MO HealthNet covers the Essure procedure (CPT code 58565). If the service is provided in the office setting (POS11), FQHC setting (POS 50), or local public health agency clinic (POS 71), bill CPT 58565 without a modifier. If the service is provided in the hospital outpatient (POS 22) or inpatient (POS 21) setting, bill CPT 58565 52.

The Sterilization Consent Form must be completed and signed at least 31 days prior to the sterilization.

## MISSOURI'S WOMEN'S HEALTH SERVICES (ME CODES 80 and 89)

MO HealthNet offers Women's Health Services to uninsured women who lose MO HealthNet eligibility 60 days after the birth of their child for up to one year. Services include family planning and limited testing and treatment of Sexually Transmitted Diseases. The treatment of medical complications occurring from the STD is **not** 

covered by this program. Eligible participants are enrolled under Medicaid Eligibility (ME) code 80.

The Centers for Medicare and Medicaid Services (CMS) has approved the Missouri Department of Social Services' request to extend Women's Health Services effective January 1, 2009 to additional women. Eligible participants for the expanded Women's Health Services program will be enrolled under ME code 89. Services for ME codes 80 and 89 are provided on a fee-for-service basis only.

#### **ELIGIBILITY CRITERIA**

To qualify for the expanded Women's Health Services Program, a woman must be:

- Uninsured, defined as not having creditable coverage for family planning services;
- 18 to 55 years of age;
- have a net family income at or below 185% of the Federal Poverty Level (FPL); and
- have assets totaling no more than \$250,000.

These women are not limited to one year of coverage and remain eligible for the program as long as they continue to meet eligibility requirements and require family planning services.

#### **BENEFIT PACKAGE**

Women's health services benefits for both ME code 80 and 89 include:

- Department of Health and Human Services approved methods of contraception;
- family planning counseling/education on various methods of birth control;
- diagnosis, testing and treatment of a sexually transmitted disease found during a family planning visit including pap tests and pelvic exams; and,
- drugs, supplies, or devices related to women's health services described above that are prescribed by a physician or advanced practice nurse (subject to the national drug rebate program requirements).

All services must be billed with a primary diagnosis of V25-V25.9 or payment for the services will be denied. A list of covered services is listed on the following pages in this section.
