

## SECTION 11 PHARMACY CLAIM FILING INSTRUCTIONS

Hospital outpatient medication claims may be submitted electronically either through a clearinghouse, billing agent or the MO HealthNet Web portal at emomed.com.

### **MANAGED CARE HEALTH PLAN PHARMACY “CARVE OUT”**

Effective October 1, 2009, the MO HealthNet Managed Care health plans no longer provide pharmacy services for their members. Pharmacy claims for all MO HealthNet Managed Care members are processed by the MO HealthNet Fee-for-Service (FFS) Pharmacy Program. The MO HealthNet FFS Pharmacy Program will pay for all hospital outpatient pharmacy services and diabetic testing supplies. Existing FFS Pharmacy Program clinical editing parameters and Preferred Drug List criteria still apply for coverage of pharmacy claims, and can be found at the following link.

<http://dss.mo.gov/mhd/cs/pharmacy/pages/clinedit.htm>.

The carve out of pharmacy services in relation to hospitals includes all medications and pharmaceuticals administered in a hospital outpatient or emergency department setting including physician-administered drugs. **Note – any medications administered to a MO HealthNet participant officially admitted to observation status must be billed to the participant’s managed care health plan.**

### **DRUG COVERAGE UNDER THE MO HEALTHNET PHARMACY PROGRAM**

All drug products produced by manufacturers that have entered into a rebate agreement with the Federal Government are reimbursable under the MO HealthNet Pharmacy Program, with the exception of Drug Efficacy Study Implementation (DESI) drugs and drugs specified in Section 13, Benefits and Limitations, of the pharmacy manual.

To comply with the Deficit Reduction Act of 2005 (DRA) states must now collect the 11-digit National Drug Codes (NDC) on all outpatient drug claims submitted to the MO HealthNet program for rebate purposes. Providers are required to submit their claims for all medications administered in the clinic or outpatient hospital setting, with the exact NDC that appears on the product dispensed or administered. Should a dispute arise between MO HealthNet utilization data and a manufacturer’s estimation of product sold, data is supplied to the manufacturer to resolve the dispute. If necessary, zip code or provider-specific utilization data is provided. Should data indicate that a provider is billing fraudulently by using NDCs other than those identifying the actual product dispensed, the information is referred to the Missouri Medicaid Audit & Compliance (MMAC) Unit and may result in legal action, provider sanctions and possible termination from the program.

## MEDICATION BILLING

The quantity to be billed for pharmacy items (e.g. creams, salves) and injectable medications dispensed to MHD patients must be calculated as follows:

- Containers of medication in solution (for example, ampules, bags, bottles, vials, syringes) must be billed by the exact cubic centimeters or milliliters (cc or ml), even if the quantity includes a decimal (i.e., if three (3) 0.5 ml vials are dispensed, the correct quantity to bill would be 1.5 mls).
- Single dose syringes and single dose vials must be billed per cubic centimeters or milliliters (cc or ml), rather than per syringe or per vial.
- Ointments, salves, or creams *must* be billed per number of grams even if the quantity includes a decimal.
- Eye drops *must* be billed per number of cubic centimeters or milliliters (cc or ml) in each bottle even if the quantity includes a decimal.
- Powder filled vials and syringes that require reconstitution must be billed by the number of vials.
- Combination products, which consist of devices and drugs, designed to be used together, are to be billed as a kit for example Copaxone, Pegasys).
- The product Herceptin, by Genentech, must be billed by milligram (mg) rather than by vial.
- Bill the number of tablets dispensed.
- Immunizations and vaccines must be billed by the cubic centimeters or milliliters (cc or ml) dispensed, rather than per dose.

Claims billed incorrectly are identified through a dispute resolution process. When these claims are identified, providers are notified and required to file adjustments to accurately reflect the quantity dispensed.

For specific questions concerning pharmacy items and injectable medication billing, contact the Pharmacy and Clinical Services Administration Unit at (573) 751-6963.
