Number of buildings: Auditors should count all buildings that are part of the center, whether residents are formally allowed to enter them or not. In situations where temporary structures have been erected (e.g., tents) the auditor should use their discretion to determine whether to include the structure in the overall count of buildings. As a general rule, if a temporary structure is regularly or routinely used to hold or house residents, or if the temporary structure is used to house or support operational functions for more than a short period of time (e.g., an emergency situation), it should be included in the overall count of buildings.	1
Number of resident housing units: Enter 0 if the center does not have discrete housing units. DOJ PREA Working Group FAQ on the definition of a housing unit: How is a "housing unit" defined for the purposes of the PREA Standards? The question has been raised in particular as it relates to facilities that have adjacent or interconnected units. The most common concept of a housing unit is architectural. The generally agreed-upon definition is a space that is enclosed by physical barriers accessed through one or more doors of various types, including commercial-grade swing doors, steel sliding doors, interlocking sally port doors, etc. In addition to the primary entrance and exit, additional doors are often included to meet life safety codes. The unit contains sleeping space, sanitary facilities (including toilets, lavatories, and showers), and a dayroom or leisure space in differing configurations. Many facilities are designed with modules or pods clustered around a control room. This multiple-pod design provides the center with certain staff efficiencies and economies of scale. At the same time, the design affords the flexibility to separately house residents of differing security levels, or who are grouped by some other operational or service scheme. Generally, the control room is enclosed by security glass, and in some cases, this allows residents to see into neighboring pods. However, observation from one unit to another is usually limited by angled site lines. In some cases, the center has prevented this entirely by installing one-way glass. Both the architectural design and functional use of these multiple pods indicate that they are managed as distinct housing units.	1

Audit Findings

Audit Narrative

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, and observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

On May 12, 2020 Rosa Parks placed Audit Notices (in English and Spanish) in strategic locations throughout the center where residents routinely live, enter and exit buildings, and participate in programming.

The Rosa Parks was asked to complete the Pre-Audit Questionnaire (PAQ) which was received from the center on May 18, 2020. Pertinent documentation received during the pre-audit phase was reviewed and follow-up clarification or requests for additional documentation and revised submittals were assessed. Documentation reviewed included, but not limited to, educational materials, training logs, posters, brochures, agency policies and procedures,

Site Review:

Immediately following the opening meeting, a tour of center was conducted. The auditor was escorted by the center's PREA Compliance Manager. The auditor was given unimpeded access to all areas of the center.

During the tour, the auditor reviewed PREA related documentation and materials located on bulletin boards, and pertinent log entries made by staff who visit work and program areas. The auditor assessed potential blind spots, and physical supervision requirements as applied to a community correctional confinement centers. Additional areas of focus during the center tour included an assessment of limits to cross-gender viewing (can residents shower, dress, and use the toilet facilities without exposing themselves to employees of the opposite gender). External advocacy and agency hotline information was assessed while touring the facilities. Postings (in English and Spanish) regarding PREA violation reporting and the agency's zero tolerance policy for sexual abuse and sexual harassment were prominently displayed in all living units, and throughout the center.

A review of logbooks and records revealed documentation of safety and PREA rounds. The Facility Administrator makes continuous rounds throughout the center. Staff announce their presence prior to entering a dormitory housing resident of the other gender. There are posting in each living unit, day room, and food service area that includes Zero Policy for sexual abuse or sexual harassment, ways of reporting sexual abuse or sexual harassment, victim advocacy group phone number and address and Missouri Youth Services PREA hotline.

Staff Interviews:

The center is staffed by 10 persons. The facility administrator oversees the overall operations of the complex. There are a minimum of two staff assigned to the facility at all times. The facility requires a minimum of one (1) direct care staff for 6 residents during waken hours and a minimum ratio of one (1) direct care staff for 16 resident on duty at all times at other times. There is always one female staff at the facility on duty at all times.

Facility services are also supplemented by DYS Family Specialist, Treatment Coordinators, a Regional Clinical Coordinator and Community Mentors.

A total of 6 random direct care staff were interviewed all shifts regarding training, their knowledge of first responder duties, reporting mechanisms for staff and residents, and their perception of sexual safety and appropriate offender privacy issues. Five (5) specialized staff were interviewed. The specialized staff included the PREA Compliance Manager, Administrative Assistant, Education Director, regional Mental Health Director and regional Nurse Manager. Telephone interviews were conducted by the Agency Head designee, Agency PREA coordinator and Agency contracting supervisor. Telephone interviews were also conducted by Hospital and Victim Advocacy program staff.

Resident Interviews:

At the time of the audit there were 8 residents assigned to the facility. All residents were interviewed. There were 5 targeted residents interviewed. The targeted residents were 4 residents that disclosed victimization at screening and 1 resident that identified as lesbian.

File Review:

The auditor reviewed five training files, four unofficial staff files, and four resident files and one contractor file. All staff have received training during the last twelve months. The unofficial files had copies of email from Headquarter staff indicated that background checks had been completed on staff. The contractor files had the same email indicating background clearance and also contained PREA training documentation. The offender files including documentation of intake screenings, and PREA education.

Investigation Review:

There were no official PREA investigations during the last 12 months. There was one resident that was interviewed by Missouri Children's Division out of Home investigation (CD-OHI) following a use of restraint. This report was originally reported as a mandatory report of child abuse and child neglect. During the initial investigation the resident made allegations of sexual abuse by one of the staff involved in the restraint. The Out of Home investigator (who is a trained Sex Abuse investigator) investigated all allegation made by the resident during the incident investigation. This investigation included interviews with residents, other residents and staff. The finding was determined to be unsubstantial. The facility was advised that the investigation was unsubstantiated however were not advised by the Out of Home Investigator of other allegations including sexual abuse prior to completion of the investigations. The facility received the report and placed a copy in the unofficial employee file. The use of restraint

investigation was discovered while the auditor was reviewing files for back ground checks. At this time it was noted on the report that the resident made several allegation including one of sexual abuse. A corrective action plan was initiated. The Missouri PREA coordinator and director of CD-OHI have agreed on a cooperative notification to the PREA coordinator and facility of any PREA allegations during the investigative process. The PREA coordinator has requested that facility administrators review all completed investigations and notify the PREA coordinator or the Hotline of any allegations of sexual abuse or sexual harassment noted during the investigation by CD-OHI or Legal affairs investigations.

Post-Onsite Phase

During this period of document review, clarifications were sought regarding PAQ entries, and discussions with the Missouri PREA Coordinator Manager as follow up for

Corrective action plan.

Center Characteristics

The auditor's description of the audited center should include details about the center type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the center, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

Rosa Parks Center is on approximately one acre of land on the campus of William Woods University. The facility is housed in a two story building. Upon entering the facility from the main entrance is an office area utilized by the administrative staff. Leaving this area the facility has a dormitory a small kitchen located on the first floor Also is a small office that is utilized by the regional nurse and outside visitors. Downstairs is a classroom, group meeting room and the facility administrator's office. Most meals are provided by the college cafeteria, which is close to the building. The center is mandated to have a 1 to 6 ratio of resident and direct care staff during waking hours and a 1 to 16 ratio of direct care staff during sleeping hours. The center does not include control room operator or intake staff as part of the direct care staff in determining minimum ratios. The average population at the center during the last 12 months was 10 residents.

Prior to coming to the center the majority of the residents are housed in a Juvenile Reception Center where a team of practitioners determine the best placement for residents. Prior to be placed at Rosa Parks the team discusses the resident with the Assistant Regional Director and the Facility Administrator. Upon arrive at the facility the Facility Administer completes an intake screening and part of the PREA education program. Usually on the same day or following day the facility administrator conducts an in-depth Safety First training program which include all components of the PREA mandated training for residents.

Rosa Parks is committed to maintaining a zero tolerance policy regarding sexual abuse and sexual harassment. As a resident of this center, everyone has the right to be free from sexual abuse, sexual harassment, neglect, and exploitation. This includes not being subjected to sexually assaultive, abusive, and/or harassing behavior from staff and other residents. Residents with disabilities are afforded the same rights and will be provided access to interpreters, presented material to effectively communicate with those residents who have intellectual disabilities, limited reading skills, blind or have low vision. Residents will have access to interpreters who can interpret effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary. Interpreters will be provided through local community resources. Residents with disabilities have equal opportunity to participate in and benefit from all aspects of Rosa Parks efforts to prevent, detect, and respond to sexual abuse and sexual harassment. While housed at Rosa Parks there is no such thing as consensual sex, meaning no person regardless of age can "agree" to have sex or sexual contact with staff or another resident. If the center learns that a resident is subjected to or a

substantial risk of imminent sexual abuse, the center shall take immediate action to protect the resident. Within this policy all references to sexual abuse includes sexual harassment, as appropriate.

Missouri Department of Youth Services employs an upper-level, agency-wide PREA Coordinator at the corporate level. The agency's organizational chart depicts her position within the agency. The PREA Coordinator oversees the agency's efforts to comply with the PREA standards in all facilities. The PREA coordinator ensures that all of its facilities have a PREA Compliance Manager with sufficient time and authority to coordinate the facilities PREA efforts.

Both the agency PREA Coordinator and Facility Compliance Manager advised they have sufficient time and authority to coordinate efforts to comply with PREA standards. The PREA compliance manager (PCM) was extremely knowledgeable and enthusiastic about PREA.

The facility administrator is designated as the PREA compliance manager.

Any employee, supervisor or manager who violates PREA mandates and in accordance with the agency's Standards of Conduct, is subject to disciplinary action, including termination. All volunteers, vendors, contractors and their representatives shall also comply with this policy or the working relationship/contract may be severed.

All claims of sexual assault will be immediately reported to the Missouri Division of Youth Services and when violation of law to local law enforcement agency.

Residents are informed orally about the zero-tolerance policy and the PREA program during in-processing. Additional interpretive services are available for residents who do not speak or read English. The agency provides resources to facilities to support the needs for deaf and blind residents. Both institution staff and residents are provided with a wealth of opportunities to become aware of PREA policies and procedures.

Compliance was determined by review of policies, posters and interviews with staff and residents.

The policy also mandates that Facility Administrator and Assistant Regional Supervisor conducts unannounced visits on all shifts during the night and weekend. The center maintains a log of these reviews that confirm their visits. Policy requires that staff will not be alerted to the unannounced unscheduled rounds occurring.

Unless there is an exigent circumstance staff of the opposite gender entering a unit will announce their presence when entering an area where residents are likely to be showering, performing bodily functions, or changing clothing. Staff will document on the unit log if an exigent circumstance occurred.

Each year during the agency reviews of staffing includes needs for cameras, staffing or rearranging the staffing plan to meet the required staff in order to maintain a safe and secure operation. Their staffing plan's annual reviews conducted in 2019 & 2020 were found to be in compliance with this standard. During the initial documentation review, the facility did not report deviations from the staffing plan during the past 12 months. The staff-to-youth ratios of 1:6 during the resident waking and 1:16 during sleeping hours is always maintained, the facility has a mechanism in place for call outs and staff volunteer to stay over if needed. Rosa Parks is a group home and utilizes staff monitoring to protect the residents from sexual abuse and harassment. Based on conversations with the PREA coordinator and facility administrator it was obvious that the facilities reviews all areas of the center for additional staffing and resident movement in order to meet the requirement of this standard.

The direct care staff were noted to be located throughout the center during the tour or review of cameras monitoring. The facilities utilize the standard of 1 to 6 direct care staff during waking hours and 1 to 16 during sleeping hours. Random interviewed direct care confirmed that they are assigned based on activities at each unit which will impact the staffing plan. The random staff stated that the center does not count control operators toward meeting this requirement. The facility administrator provided a daily roster that indicates the staffing utilized during the prior 24 hours.

The Facility Manager and Assistant Regional Administrator both conduct and document unannounced rounds on all shifts and all areas of the facility to monitor and deter staff sexual abuse and harassment. Compliance was determined by review of policies, documentation and interview with staff confirm compliance with this standard.

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the center does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the center.

The following policies, directives, memorandum and agency or facility supplements were reviewed for compliance with this standard.

DYS Policy 5.8 Searches for Contraband
 DYS Policy 9.6 Program Supervision
 DYS Policy 9.18 PREA
 DYS Policy 7.2 Standards

Agency policies 5.08, 7.2, and 9.18 allow for pat-down searches in exigent circumstances. While policy provides for pat-down searches it provides searches as a last resort after several other interventions are attempted. Based on the interventions and interviews with staff and residents, Rosa Parks does not conduct pat down searches. Any pat down searches requires two staff one of which must be female after all other interventions have been attempted. Based on interviews with staff and residents there have been no pat down searches in the last 12 weeks. Policy mandate that strip or cavity searches will not be conducted. Agency policy prohibits searching or physically examining a transgender or intersex youth for the sole purpose of determining the youth's genital status. Policy mandate that the center shall document and justify all searches.

All residents are able to shower, perform bodily functions, and change clothing without nonmedical staff of the opposite gender viewing their genitals, buttocks, breasts except in the case of an emergency, by accident. All toilets have doors and all showers have curtains. DYS

staff, both male and female supervise in the bathroom/shower areas. The staff do not view the youth unclothed but are able to see feet and heads and are required to remain in the bathroom area providing awareness supervision. Staff announce their presence when entering a housing unit.

A tour of the center found that all areas that are utilized for housing residents have necessary barriers to allow resident to shower without being viewed by person of the opposite gender and privacy from other residents during the showering process.

A review of the staff training plan includes intervention techniques and standards required to be utilized prior to conducting any searches. Interview with random staff confirmed they had received training on intervention techniques. All of the random interview staff confirmed that there have been no searches during the last 12 months. Compliance was determined by review of the training plan, interviews with staff and residents.

DYS Policy 9.18 PREA

Memorandum of available advocacy services available to facilities from Agency PREA coordinator.

DYS policy includes upon learning that a resident may at substantial risk of imminent sexual abuse or has been sexually abused, immediate corrective action shall be taken which shall include the protections of the resident(s).

All staff (including medical and mental health practitioners) shall report sexual abuse to the facility administrator and notify PREA Coordinator by the "Hot line for reporting". All allegations

of sexual abuse/sexual harassment and staff neglect or violation of responsibilities that may have contributed to such incidents will be investigated either criminally or administratively.

Missouri Division of Youth Services (DYS) Policy 9.18 (Prison Rape Elimination Act of 2003) contained the elements of the standard and identified that all allegations of sexual abuse and sexual harassment be referred to the appropriate investigative agency based upon the victim's age. Additionally, policy requires protocols for informed consent, confidentiality, reporting to law enforcement, and reporting to child abuse investigative agencies. Missouri Division of Youth Services does not conduct their own investigations of sexual abuse and harassment. Missouri Children's Division out of Home Investigation Unit investigates sexual abuse/harassment for DHS regarding youth under the age of 18. Children over the age of 17 are referred to Division of Legal Services Investigation Unit. In cases that are criminal in nature the facility administrator would contact the local law enforcement. In other cases the Division of Legal Services Investigative Unit would conduct the investigation or notify the local law enforcement and investigate along with the local law enforcement. Missouri Division of Youth Services has requested investigative unit follow 115.21 b standards in investigating sexual abuse or sexual harassment. Residents and staff shall immediately report sexual abuse or sexual harassment, staff neglect or violation of staff responsibilities, or retaliation to any employee, hotline or by using the center grievance process. There will be no time limit on when an allegation of sexual abuse can be reported.

The facility does not have a MOU with The Rainbow House Regional Child Advocacy Program, however there is an agreement to utilize The Rainbow House Regional Child Advocacy Program as part of the Rainbow House program for regional support. The Rainbow House director was contacted and provided a review of the program and services available to residents at Rosa Parks at no cost to the resident. The Rainbow House was very knowledgeable about the PREA programs and very familiar with the Rosa Parks program. She verbally provided qualification of advocacy staff at the program and the services they provide to residents at Rosa Parks. The University of Missouri Health Care provides SAFE nurses for Forensic Examinations. The Hospital discussed staff were available twenty four hours a day to provide these services. The hospital has a working relationship with the Rainbow House and transferred my call to the Rainbow House for details about the Hospital's Forensic examination Program. Juvenile fourteen years of age or less are provided services at the Women and Children by SAFE staff. Juvenile over the age of 14 are provide services by SAFE staff at the central hospital area. Both programs are located in the same buildings and the Rainbow House would provide a staff advocate to accompany the juvenile and family members during the examination. Compliance was determined through the review of the memo from DHS Human Resources Director and interviews with PREA Coordinator, Mental Health Provider, the Rainbow House Regional Child Advocacy Director and staff from the University of Missouri Health Care.

The agency ensures that an administrative or criminal investigation is completed for all allegations of sexual abuse and sexual harassment. All staff are required to refer all alleged incidents of sexual abuse, harassment or misconduct to Missouri Children's Division Out-of-Home Investigation Unit (CD-OHI) for investigation and determination of child abuse and CD-OHI will contact the appropriate local law enforcement for the determination of criminal charges. Additionally, all staff refer all allegations of sexual abuse and harassment to the Central Office and complete the DYS Mandatory Reporting form. The DYS PREA policy and the DYS Fundamental Practices form which describes how investigative responsibilities are handled for allegations of sexual abuse and harassment can be found at the Missouri DYS's website. The parent/guardian is provided with the DYS Youth/Parent Handbook (Safety First) identifying the zero tolerance to sexual abuse or sexual harassment and the hotline information on how to report. Assessment Summary
DYS Policy 9.5 Resident Care
DYS Policy 9.18 PREA
DYS Policy 9.8 Separation

All information obtained upon intake and periodically throughout the residents' confinement will be used to make housing, bed, program, and education assignments with the goal of keeping all residents safe and free from sexual abuse.

DYS Policy 9.8 Separation provide that a resident may be isolated only as a last resort when less restrictive measure are inadequate to keep them and other residents safe, and then only until an alternative means of keeping all residents safe can be arranged. If a resident is isolated the center shall clearly document the basis for the center's concern for the resident's safety and the reason why no alternative means of separation can be arranged.

Rosa Parks has one dormitory and no other alternative for separation from other residents or staff. The facility administrator and assistant regional director will develop a plan of action to keep the resident safe. This can include moving to a facility located in close proximity to the Rosa Parks, releasing to home confinement or holding resident in private office with staff one on one supervision until appropriate remedies can be assessed and implemented. Even during any period of separation from other residents, residents shall not be denied large-muscle exercise, educational programming, special education services and other programs to the extent possible. Residents separated from other residents shall receive daily visits from a medical or mental health care clinician.

Lesbian, gay, bisexual, transgender, or intersex (LGBTI) residents shall not be placed in particular housing, bed, or other assignments solely on the basis of such identification or status, nor shall agencies consider LGBTI identification or status as an indicator of likelihood of being sexually abusive. In deciding to assign a transgender or intersex resident to a center for male or female residents, and in making other housing and programming assignments, the agency shall consider on a case-by-case basis whether a placement would ensure the resident's health and safety, and whether the placement would present management or security problems. Placement and programming assignments for each transgender or intersex resident shall be reassessed by the Administrator and PREA Coordinator at least twice each year to review any threats to safety experienced by the resident. A transgender or intersex resident's own view with respect to his/her own safety shall be given serious consideration. Transgender or intersex residents shall be given the opportunity to shower separately from other residents.

The center has not segregated or removed residents from the program for a PREA incident in the last 12 months. The agency PREA coordinator, assistant regional director and facility administrator interviewed indicated that the center would comply with requirements of the standard if transgender were housed at the facility. The Facility Administrator indicated that the initial screening and any updated screening information is considered for placement of residents on a continuous basis. Residents with past history of sexual victimization indicated they were interviewed by Mental Health staff during their initial intake into the facility. Compliance of this standard were determined by review of the screening instrument, interviews with regional mental health director, residents with history of sexual victimization, victim advocate representative and facility administrator.
