<p>Number of buildings:</p> <p>Auditors should count all buildings that are part of the facility, whether residents are formally allowed to enter them or not. In situations where temporary structures have been erected (e.g., tents) the auditor should use their discretion to determine whether to include the structure in the overall count of buildings. As a general rule, if a temporary structure is regularly or routinely used to hold or house residents, or if the temporary structure is used to house or support operational functions for more than a short period of time (e.g., an emergency situation), it should be included in the overall count of buildings.</p>	3
<p>Number of resident housing units:</p> <p>Enter 0 if the facility does not have discrete housing units. DOJ PREA Working Group FAQ on the definition of a housing unit: How is a "housing unit" defined for the purposes of the PREA Standards? The question has been raised in particular as it relates to facilities that have adjacent or interconnected units. The most common concept of a housing unit is architectural. The generally agreed-upon definition is a space that is enclosed by physical barriers accessed through one or more doors of various types, including commercial-grade swing doors, steel sliding doors, interlocking sally port doors, etc. In addition to the primary entrance and exit, additional doors are often included to meet life safety codes. The unit contains sleeping space, sanitary facilities (including toilets, lavatories, and showers), and a dayroom or leisure space in differing configurations. Many facilities are designed with modules or pods clustered around a control room. This multiple-pod design provides the facility with certain staff efficiencies and economies of scale. At the same time, the design affords the flexibility to separately house residents of differing security levels, or who are grouped by some other operational or service scheme. Generally, the control room is enclosed by security glass, and in some cases, this allows residents to see into neighboring pods. However, observation from one unit to another is usually limited by angled site lines. In some cases, the facility has prevented this entirely by installing one-way glass. Both the architectural design and functional use of these multiple pods indicate that they are managed as distinct housing units.</p>	4

Audit Findings

Audit Narrative (including Audit Methodology)

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, and observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The Missouri Department of Youth Service entered contract for the Prison Rape Elimination Act (PREA) auditing services with the Correctional Management and Communication Group. The primary sole auditor is Robert Manville, and no conflict of interest exists between the two parties. The contract explained the efforts toward transparency, the role of third parties and support staff, compliance considerations regarding the PREA Standards, Department of Justice certification requirements, enough time to conduct the audit, and planning for any corrective action phases.

The auditor and Missouri Department of Youth Services PREA support staff conducted a telephone interview with Waverly Regional Youth Center Staff and the auditor on April 12, 2021. During the interview the facility provided details of population, staffing pattern, Pandemic restriction and schedules for interviews and timeframe. It was determined that this audit would be a two day audit starting on May 20, 2021.

On April 5 Waverly Regional Youth Center (WRYC) placed Audit Notices (in English and Spanish) in strategic locations throughout the center where residents routinely live, enter and exit buildings, and participate in programming.

The Waverly Regional Youth Center was asked to complete the Pre-Audit Questionnaire (PAQ) which was received from the center on April 5, 2021. Pertinent documentation received during the pre-audit phase was reviewed and follow-up clarification or requests for additional documentation and revised submittals were assessed. Documentation reviewed included, but not limited to, educational materials, training logs, posters, brochures, agency policies and procedures.

The facility houses up to 48 male residents and has a staffing plan for 52 full time employees. At the time of the audit the facility was employing 52 full time staff. The facility is managing a ratio of 1 to 6 during waken hours and 1 to 10 during sleeping hours through overtime and utilizing administrative during the pandemic.

The Waverly Regional Youth Center (WRYC) is a 24-hour, residential Youth Center operated by the Missouri Division of Youth Services (DYS), a division of the Missouri Department of Social Services. Located in Waverly, Missouri, WRYC has the capacity to house 48 males. The length of stay in the program averages 265 days. Upon arrival, each youth is assigned a personal advocate. In this role the staff member strives to facilitate the practical needs of the youth which reach beyond those of the institutional settings. Prior to arriving at the facility, the

facility manager and most often the assistant regional administrator review the resident's treatment plan. The treatment plan is developed by a team of staff including the community case manager and clinical director. Most youth are housed at the agency's diagnostic and assessment center prior to development of the resident's treatment plan. WRYC provides educational services with classes five days a week year round accredited by the State of Missouri. The educational program offers coursework in career and vocational exploration, social studies, science, language arts, mathematics, and basic life skills. Support services are provided for youth with special or remedial needs. When appropriate, youth may work toward completing the High School Diploma or High School Equivalency. Certificate.

Medical services are coordinated by the full-time Licensed Practical Nurse (LPN). The physician visits the facility at least once a month and as needed. Dental services such as examinations, fillings and cleanings are provided through Big Smiles every six months. Through Telehealth technology, a psychiatrist provides weekly services to the facility. The Clinical Treatment Coordinator provides services to the facilities in the region

Site Review:

The onsite audit of the facility was conducted on May 20- 21, 2021. Immediately following the opening meeting, a tour of Waverly Regional Youth Center was conducted. The auditor was escorted by the center's PREA Compliance Manager. The auditor was given unimpeded access to all areas of the center.

During the tour, the auditor reviewed PREA related documentation and materials located on bulletin boards, and pertinent log entries made by staff who visit work and program areas. The auditor assessed potential blind spots, and physical supervision requirements as applied to a community correctional confinement center. Additional areas of focus during the center tour included an assessment of limits to cross-gender viewing (can residents shower, dress, and use the toilet facilities without exposing themselves to employees of the opposite gender). External advocacy and agency hotline information was assessed while touring the facilities. Postings (in English and Spanish) regarding PREA violation reporting and the agency's zero tolerance policy for sexual abuse and sexual harassment were prominently displayed in all living units, and throughout the center.

A review of logbooks and records revealed documentation of safety and PREA rounds. The Facility Manager makes continuous rounds throughout the center. The assistant regional administrator is also actively involved in the facility youth management programs. Staff announce their presence prior to entering a dormitory housing resident of the other gender. There are posting in each living unit, day room, and food service area that includes Zero Policy for sexual abuse or sexual harassment, ways of reporting sexual abuse or sexual harassment, victim advocacy group phone number and address and Missouri Youth Services PREA hotline.

Staff Interviews:

The center is staffed by 52 persons. The Facility Manager oversees the overall operations of the complex. There are a minimum of two staff assigned to the facility at all times. The facility requires a minimum of one (1) direct care staff for 6 residents during waken hours and a minimum ratio of one (1) direct care staff for 10 residents on duty during sleeping hours. The facility operates as a cohesive group with two staff and one Group Leader providing supervision and support of up to 12 residents. Each resident has a staff advocate that provides daily interaction and feed back to the residents and completes a weekly progress review with the resident.

Facility services are also supplemented by DYS Family Specialist, Treatment Coordinators, a Regional Clinical Coordinator and Community Mentors.

A total of 14 random direct care staff were interviewed all shifts regarding training, their knowledge of first responder duties, reporting mechanisms for staff and residents, and their perception of sexual safety and appropriate offender privacy issues. Eight (8) specialized staff were interviewed. The specialized staff included the Facility Manager (PREA Compliance Manager), Group Team Leader, Education staff, Nurse, Administrative Assistant, retaliation monitor and Assistant Regional supervisor. These staff have collateral duties that include all areas required for a PREA audit. Telephone interviews were conducted by the Agency Head designee, Agency PREA coordinator and Agency contracting supervisor. Telephone interviews were also conducted with staff of Out of Home Investigation and Person Centered Counseling LLC.

Resident Interviews:

At the time of the audit there were 28 residents assigned to the facility. Nineteen residents were interviewed. None of the resident claimed history of victimization. The interviews with residents was enlightening in the center's goal to maintain a safe environment. Resident spoke about conducting Safety First homework, daily meeting about safety first and daily interactions with group leaders, assistant manager, facility manager, assistant regional manager, regional mental health staff and nurse. Interviewing the residents was also a refreshing interview process. The youth at the facility felt safe and many of the youth wanted to share all aspects of their past, present and future endeavors without being asked.

Staff File Review:

The auditor requested random personnel background checks and reviewed 10 employee training records and one contractor files. The central office staff provided email documentation that prior to employment a background check was completed and is maintained on file in the central office. The contractor files had the same email indicating background clearance and also contained PREA training documentation.

Staff Training Records:

Ten staff training records were reviewed. Including in the training records review were the facility director, medical staff, contractors, and 6 random staff. All training records revealed that staff have attended training a minimum of once a year. Specialized training was reflected in the medical staff training files.

Resident File Review:

Ten Resident files were reviewed. The resident's file contained documentation of Intake Screening, Intake PREA notification, Rescreening and formalized PREA education. Each residential file also contains daily, weekly, and monthly advocate and Group Leader updates of the resident's progress in meeting treatment objectives. All time requirements were met on each area. The resident files contains a six month treatment team review. The review is comprehensive and includes PREA related documentations of safety, sexual victimization and sexual orientation.

Investigation Review:

There was no PREA investigations involving Waverly Regional Youth Center since the last PREA audit. A review of the PREA audit from 2018 documented there had no allegations of sexual abuse or sexual harassment during that audit. An interview with the assistant regional administrator confirmed the facility has not had an allegation of sexual abuse or sexual harassment.

Facility Characteristics

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

During the tour, the auditor reviewed PREA related documentation and materials located on bulletin boards, and pertinent log entries made by staff who visit work and program areas. Additional areas of focus during the center tour included an assessment of limits to cross-gender viewing (can residents shower, dress, and use the toilet facilities without exposing themselves to employees of the opposite gender). External advocacy and "internal hotline" information was assessed while touring the facilities. Postings (in English and Spanish) regarding PREA violation reporting and the agency's zero tolerance policy for sexual abuse and sexual harassment were prominently displayed in all living units, and throughout the center. The tour revealed adequate staff coverage, and physical supervision.

DYS Policy 9.28 Developing Relationships Section III E
DYS Policy 3.81 Employee Conduct Section III10
DYS Policy 3.23 Ethics Standard Section IIIA!
Organizational Chart

Missouri Division of Youth Services (DYS) is committed to a zero-tolerance standard for incidents of sexual abuse and sexual harassment. The purpose of DYS Policy 9.18 PREA is to describe how the Prison Rape Elimination Act (PREA) per 28CFR Section 115.5-115.501 shall be implemented within DYS. This policy provides the division's approach to preventing, detecting, and responding to such conduct, within DYS residential and county detention centers contracted for reception and detention services.

The DYS fundamental principles serves as a center piece in operating the agency. PREA is not seen as a facility role, however all staff from volunteers to the Agency Director have definitive roles in developing life skills for residents including developing appropriate boundaries for all staff and residents and supporting residents in this phase of their life. Resident's support team includes community service providers, case managers, clinical supervisors, regional mental health director, regional medical nurses, assistant regional directors, and advocacy services that are utilized as an extension of support for resident.

Missouri Division of Youth Services values and fundamental principles are the everyone has the right to be free from sexual abuse, sexual harassment, neglect, and exploitation. This includes not being subjected to sexually assaultive, abusive, and/or harassing behavior from staff and other residents. DYS policy PREA establishes that the division of youth services, all facilities, staff and residents, volunteers, contractors, or visitor are committed to a zero-tolerance standard for incidents of sexual abuse and sexual harassment. Residents with disabilities are afforded the same rights and will be provided access to interpreters, presented material to effectively communicate with those residents who have intellectual disabilities, limited reading skills, blind or have low vision. Residents will have access to interpreters who can interpret effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary. Interpreters will be provided through local community resources. Residents with disabilities have equal opportunity to participate in and benefit from all aspects of Waverly Regional Youth Center efforts to prevent, detect, and respond to sexual abuse and sexual harassment. While housed at Waverly Regional Youth Center there is no such thing as consensual sex, meaning no person regardless of age can "agree" to have sex

or sexual contact with staff or another resident. If the center learns that a resident is subjected to or a substantial risk of imminent sexual abuse, the center shall take immediate action to protect the resident. Within this policy all references to sexual abuse includes sexual harassment, as appropriate.

Missouri Department of Youth Services employs an upper-level, agency-wide PREA Coordinator at the corporate level. The agency's organizational chart depicts her position within the agency. DYS mandate employee to oversee statewide agency efforts to comply with the PREA standards as set forth in this policy for all DYS residential facilities and county detention centers contracted for reception and detention services. DYS mandate site specific employee designated to coordinate the facility's efforts to comply with the PREA standards as set forth in this policy. A Youth Facility Manager shall serve in this role at each DYS residential site. The PREA Coordinator oversees the agency's efforts to comply with the PREA standards in all facilities. The PREA coordinator ensures that all its facilities have a PREA Compliance Manager with sufficient time and authority to coordinate the facilities PREA efforts. Both the agency PREA Coordinator and Facility Compliance Manager advised they have sufficient time and authority to coordinate efforts to comply with PREA standards. The PREA compliance manager (PCM) was extremely knowledgeable and enthusiastic about PREA. The Facility Manager is designated as the PREA compliance manager.

Any employee, supervisor or manager who violates PREA mandates and in accordance with the agency's Standards of Conduct, is subject to disciplinary action, including termination. All volunteers, vendors, contractors, and their representatives shall also comply with this policy or the working relationship/contract may be severed.

All claims of sexual assault will be immediately reported to the Missouri Division of Youth Services and when violation of law to local law enforcement agency.

The agency provides resources to facilities to support the needs for deaf and blind residents. Both institution staff and residents are provided with a wealth of opportunities to become aware of PREA policies and procedures. In general discussion with youth, it was obvious that the youth at Waverly Regional Youth Center that youth feel safe and comfortable to discuss protecting each other from sexual abuse or sexual harassment.

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

The following policies, directives, memorandum and agency or facility supplements were reviewed for compliance with this standard.

DYS Policy 9.6 Program Supervision
DYS Policy 9.18 PREA
DYS Policy 5.8 Searches for Contraband
DYS Policy 6.1 Programmatic Rights of Youth and Grievance Process
Unannounced Rounds
Annual Staffing Plans

The agency requires each facility it operates to develop, document, and make its best efforts to comply on a regular basis with a staffing plan that provides adequate levels of staffing to protect residents against abuse.

DYS Policies 9.6 Program Supervision and 9.18 PREA address staffing, supervision, monitoring, and unannounced rounds. Policy 9.6 outlines the considerations for staffing and provides guidance to staff in adhering to the staffing ratios. The staffing plan, staff interviews and observations during the comprehensive facility tour revealed the adherence to staffing ratios. The Direct Care Staffing Pattern documents the facility's ratios as 1:6 during the waking hours and 1:10 during the sleeping hours. The work schedules and management staff ensure adherence to the Direct Care Staffing Pattern

The facility requires that intermediate-level or higher level staff conduct unannounced rounds to identify and deter staff sexual abuse and sexual harassment. The facility prohibits staff from alerting other staff of the conduct of such rounds

Group Leaders are actively involved in all aspects of the facility program, including making unannounced rounds during their shift and at other time when not assigned to be on duty. The Facility Manager and Assistant Regional Supervisor conducts unannounced visits on all shifts during the night and weekend. The center maintains a log of these reviews that confirm their visits.

Unless there is an exigent circumstance staff of the opposite gender entering a unit will announce their presence when entering an area where residents are likely to be showering, performing bodily functions, or changing clothing. Staff would document on the unit log if an exigent circumstance occurred.

Each year during the agency reviews of staffing includes needs for cameras, staffing or rearranging the staffing plan to meet the required staff to maintain a safe and secure operation. Their staffing plan's annual reviews conducted in 2021 were found to be following this standard.

The staffing plan included:

- 1) Generally accepted detention and correctional/secure residential practices.
- (2) Any judicial findings of inadequacy.
- (3) Any findings of inadequacy from Federal investigative agencies.
- (4) Any findings of inadequacy from internal or external oversight bodies.
- (5) All components of the facility's physical plant (including "blind spots" or areas where staff or residents may be isolated).
- (6) The composition of the resident population.

- (7) The number and placement of supervisory staff.
- (8) Institution programs occurring on a particular shift.
- (9) Any applicable State or local laws, regulations, or standards.
- (10) The prevalence of substantiated and unsubstantiated incidents of sexual abuse; and
- (11) Any other relevant factors.

The facility did not report deviations from the staffing plan during the past 12 months. The staff-to-youth ratios of a minimum of 1:6 during the resident waking and minimum of 1:10 during sleeping hours is always maintained, the facility has a mechanism in place for call outs and staff volunteer to stay over if needed. Waverly Regional Youth Center utilizes staff monitoring to protect the residents from sexual abuse and harassment. Based on conversations with the PREA coordinator and Facility Manager it was obvious that the facilities reviews all areas of the center for additional staffing and resident movement in order to meet the requirement of this standard.

The direct care staff were noted to be located throughout the center during the tour. The facilities utilize the standard of minimum of 1 to 6 direct care staff during waking hours and minimum of 1 to 10 during sleeping hours. Random interviewed direct care confirmed that they are assigned based on activities at each unit which will impact the staffing plan. The random staff stated that the center does not count control operators, toward meeting this requirement. The Facility Manager provided a daily roster that indicates the staffing utilized during the prior 24 hours.

The Facility Manager and Assistant Regional Administrator both conduct and document unannounced rounds on all shifts and all areas of the facility to monitor and deter staff sexual abuse and harassment. Compliance was determined by review of policies, documentation and interview with staff confirm compliance with this standard. Staff could not meet with the auditor until they were properly relieved to ensure the facility always had a 1 to 6 ratio.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor’s analysis and reasoning, and the auditor’s conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

The following policies, directives, memorandum and agency or facility supplements were reviewed for compliance with this standard.

- DYS Policy 5.8 Searches for Contraband
- DYS Policy 9.6 Program Supervision
- DYS Policy 9.18 PREA
- DYS Policy 7.2 Standards
- Waverly Regional Youth Center Staff Training Curriculum
- Division of Youth Services Training Guide for physical searches of youth in a Residential Set
- Addendum to training records, explanation of code for cross gender pat down training
- Training-guide-for-physical-searches-of-youth-in-a-residential-setting

Agency policies 5.08, 7.2, and 9.18 allow for pat-down searches in exigent circumstances. While policy provides for pat-down searches, it provides searches as a last resort after several other interventions are attempted. Based on the interventions and interviews with staff and residents, Waverly Regional Youth Center does not conduct pat down searches. Any pat down searches requires two staff and only when all other interventions have been attempted. When searches are completed, staff have extensive training of pat searches and provided clear boundaries and training on conducting any searches. Based on interviews with staff and residents there have been no pat down searches in the last 12 months. Policy mandate that strip or cavity searches will not be conducted. Policy mandate that the center shall document and justify all searches.

DYS Policy 7.2 prohibits staff from searching or physically examining a transgender or intersex youth for the sole purpose of determining the youth’s genital status; this information was also verified through interviews with direct care staff. When the genital status of a youth is unknown, learning this information would be part of a broader mental health and medical examination conducted by mental health and medical practitioners in private.

All residents can shower, perform bodily functions, and change clothing without nonmedical staff of the opposite gender viewing their genitals, buttocks, breasts except in the case of an emergency, by accident. All toilets have doors, and all showers have curtains. DYS staff, both

male and female supervise in the bathroom/shower areas. The staff do not view the youth unclothed but are able to see feet and heads and are required to remain in the bathroom area providing awareness supervision. Staff announce their presence when entering a housing unit.

A tour of the center found that all areas that are utilized for housing residents have necessary barriers to allow resident to shower without being viewed by person of the opposite gender and privacy from other residents during the showering process.

The facility has implemented procedures, guiding staff and ensuring youth are able to shower, change clothes and perform bodily functions without being viewed by female staff. Direct care staff and youth interviews and shower and bathroom procedures confirmed the practices for youth being provided reasonable privacy as they perform bodily functions, shower and change clothes. A youth enters a shower stall dressed and is dressed in his clean clothes when he exits the shower. Staff and youth interviews and observations confirmed female staff members generally announce their presence upon entering the dorms, in accordance with Policy

A review of the staff training plan includes intervention techniques and standards required to be utilized prior to conducting any searches. Interview with random staff confirmed they had received training on intervention techniques. DYS has added techniques to conduct cross gender part down searches for staff annual in service training. All of the random interview staff confirmed that there have been no searches during the last 12 months. Compliance was determined by review of the training plan, interviews with staff and residents.

The following policies, directives, memorandum and agency or facility supplements were reviewed for compliance with this standard.

Memorandum from Agency Human Resources Director and Supporting Spreadsheet
 DYS Policy 9.18 PREA
 DYS Policy 2-107 Background Checks on Current Employees

DYS Policy 2-107 Background Checks

Explanation of Background Check Clearance Email Notification to facility

DYS shall not hire or promote anyone who may have contact with youth and shall not enlist the services of any contractor who may have contact with youth, who.

7. DYS shall conduct annual criminal background records checks as defined in DSS 2-107 background checks on current employees, volunteers/student practicum's, and contractors who may have unsupervised contact with youth

Prior to offering employment facilities will notify the agency Human Resources office. The HR staff send an email on whether an individual is approved or disqualified. Once an individual is approved for hire, the new employee begins the DYS training and orientation process. The PREA coordinator interview confirmed the staff hired had documented criminal background checks and the questions regarding past conduct were asked and responded to during the hiring process. The agency conducts a yearly review of all applicants utilizing a Statewide background history as indicated above and notifies the facility of any staff that have adverse background information. Additionally, the volunteers and contractors who have contact with residents have documented criminal background checks and yearly reviews of background history.

DYS Policies and practices are aligned with the requirements of the standard however they provide background checks occur prior to employment and every year thereafter. A review of documentation and the interview confirmed the related information contained in the Policies. The interview, supported by Policy 3.8 Employee Conduct, revealed staff has a continuing duty to report related misconduct. Omission of such conduct and providing false information are grounds for termination. All staff members have access to agency policies.

DYS policy mandates that facilities will not hire or promote anyone who has been civilly or administratively adjudicated to have been convicted of engaging in or attempted to engage in sexual activity by any means. Also, the agency does not hire anyone who has engaged in sexual abuse in a prison, jail, community confinement facility, or anyone, who has used or attempted to use force in the community to engage in sexual abuse

The Agency Policy states any incidents of sexual harassment by a staff member will be taken into consideration if the staff member is eligible for promotion. Prior to a promotion the facility will conduct a promotion board. Prior to meeting with the board the applicant completes a questionnaire that includes all areas of the standard. The interview questions for employment also address previous misconduct. The evidence shows the facility considers any incident of sexual harassment in determining whether to hire or promote anyone, or to enlist the services of any contractor, who may have contact with residents. Policy states any incidents of sexual harassment by a staff member will be taken into consideration if the staff member is eligible for promotion. The interview questions for employment also address previous misconduct. The evidence shows the facility considers any incident of sexual harassment in determining whether to hire or promote anyone, or to enlist the services of any contractor, who may have contact with residents.

Prior to determining compliance the auditor requested background verification for staff interviewing for hiring. The auditor asked the facility to request background check verification for all persons whose last name began with the letter B, M or W. The facility was able to provide these background check verifications. The auditor compared the emails with a roster of all staff and found the facility had provided all background investigation report emails. The Agency conducts a background check on all staff each year so a requirement for review of staff with over five years of tenure was not needed. Compliance was determined by review of personnel and PREA policies, interview of the PREA Coordinator, Facility Manager, and personnel staff. Further documentation was provided by email verifying ability to review all background checks which are in the agency's central office.

Missouri Children's Division out of Home Investigation Unit investigates sexual abuse/harassment for DYS regarding youth under the age of 18. Children over the age of 17 are referred to Division of Legal Services Investigation Unit. In cases that are criminal in nature the Facility Manager would contact the local law enforcement. The facility does not have a MOU with Person Centered Counseling LLC. The Center director was contacted and provided a review of the program and services available to residents at the advocacy center at no cost to the resident. He verbally provided qualification of advocacy staff at the program and the services they provide to residents at Waverly Regional Youth Center. The Advocacy Program would not provide a qualified advocate to accompany guardian and youth to the area hospital for forensic examination. The regional mental health staff indicated in her interview that the facility or community case manager would notify her, and she would go to the hospital to be with the family and resident. Her credentials were provided to the auditor.

Forensic medical examinations will be conducted by providers through Sexual Assault Forensic Examination-Child Abuse Resource and Education (SAFE-Care). The providers are physicians, nurse practitioners, or physician assistants, who are specially trained to provide medical evaluations of youth when sexual assault is suspected. Facility Health Screening Instrument Initial Health Screening - revised

The Missouri Division of Youth Services has developed a seamless system to provide youth in the State a Missouri the best possible program to succeed. Prior to arriving at a facility, most residents go through a reception center where they receive a thorough review of their history, mental health needs, family orientation and a plan of care. Prior to arriving at the facility, the Facility Manager receives a synopsis of the resident's strength and needs. The Facility Manager meets with the resident in an informal setting to discuss the facility program and conducts the initial screening utilizing the PREA vulnerability review.

The Facility Manager utilizes the prescreening, medical screenings, court records, case files, center behavioral records and other relevant documentation from the resident's files to determine the resident's vulnerability.

Sensitive information obtained will not be exploited to the resident's detriment by staff or other residents. All staff will follow appropriate confidentiality when dealing with sensitive information. Information obtained will only be used to make housing, bed, program, and education assignments with the goal to keep all residents safe and free from sexual abuse and to reduce the risk of victimization.

Information is gathered through staff conversations with the resident, information provided by the probation department, and/or family member, and incident reports written by the staff. This information will be placed in the resident's file and relayed to the Facility Manager and team leader on duty. If warranted, the supervisor will notify the Facility Manager to determine if further action is necessary.

If residents indicates they have a history of sexual victimization the facility will enter a Hotline report and notify the resident's clinical supervisor and case manager. The OHI will contact the resident and arrange a time to meet with the resident, case manager, medical/mental health staff and guardian unless the guardian has been identified as the perpetrator. If this has not been previously reported the clinical supervisor and case manager will review and revise the treatment plan when appropriate. The resident will be provided an opportunity to receive follow up therapy. When appropriate the OHI or case manager will discuss and meet with the resident and guardian prior to treatment programs offered.

External Agency Investigation Standards

The Child Welfare investigative manual provides information regarding the laws on child abuse and neglect and the application of the Preponderance of Evidence standard. The law defines the Preponderance of Evidence standard as "that degree of evidence that is of greater weight or more convincing than the evidence which is offered in opposition to it or evidence which shows the fact to be proved to be more probable than not. "When staff determines child abuse or neglect by a Preponderance of Evidence, staff will need to consider the legal standards related to child abuse or neglect and apply the Preponderance of Evidence standard to reach their conclusion.

Compliance of the standard was determined by reviewing the Child welfare manual, External Agency Investigation Standards, and interview with the agency PREA coordinator and PREA compliance manager.

Missouri Division of Youth Services requires ongoing medical and mental health care for sexual abuse victims and abusers. Additionally, policy requires the facility to offer medical and mental health evaluations and appropriate follow-up treatment. Victims of sexual abuse will be transported to Local Hospital where they will receive treatment and where physical evidence can be gathered by a certified SAFE medical examiner. Based on reviewing the mission and in interviews with all administrators at Waverly Regional Youth Center, housing and programming at the center is part of a total program that includes community care specialist such as case specialist, medical care such as regional nurses, mental health such as regional mental health director, contracting mental health professionals and after care programs through care specialist and family support systems.

The evaluation and treatment shall include, as appropriate, follow-up services, treatment plans, and when necessary, referrals for continued care following their transfer to, or placement in, other facilities, or their release from custody. Medical and mental health services shall be provided to the victims consistent with the community level of care.
